"In this book, nationally known headache specialists Drs Lawrence Newman and Morris Levin have simulated the "curbside consultation" in a representative set of 33 "mini-cases" of headache and facial pain. The key questions in each are addressed, much as a consultant would do over the phone or in the hallway. This volume is divided into three sections that cover the typical ground for head/face pain consultation: (1) Diagnostic Questions, (2) Treatment Considerations, and (3) Prognostic, Social and Legal Issues. Recommendations are based on the most current evidence available. Diagnostic thinking is presented along the lines of the International Classification of Headache Disorders, second edition (ICHD-II). A list of key clinical points appears at the end of each case discussion, followed by a list of suggested articles or chapters for those interested in doing further reading on the subject. Tables are provided for quick reference in most chapters."--BOOK JACKET.
