Readers can relive the true golden age of high-performance classic speedboats in this book that covers these mighty wooden-

hulled craft from around World War I until just before the second World War. This was an era when speed was still a new plaything, and speedboats and aircraft were raced as passionately as were automobiles; when massive mahogany speedboats powered by engines from suppliers such as Rolls-Royce competed fiercely against rivals from around the world. Classic speedboat enthusiasts will relish the cutaway drawings of these craft, as well as the choice archival photography and the modern color photography of these now-impeccably restored beauties.

#### Black Swan

Six months after its American introduction in 1985, the Yugo was a punch line; within a year, it was a staple of late-night comedy. By 2000, NPR's Car Talk declared it "the worst car of the millennium." And for most Americans that's where the story begins and ends.

Hardly. The short, unhappy life of the car, the men who

built it, the men who imported it, and the decade that embraced and discarded it is rollicking and astounding, and one of the greatest untold business-cum-morality tales of the 1980s. Mix one rabid entrepreneur, several thousand "good" communists, a willing U.S. State Department, the shortsighted Detroit auto industry, and improvident bankers, shake vigorously, and you've got *The Yugo: The Rise and Fall of the Worst Car in History*. Brilliantly re-creating the amazing confluence of events that produced the Yugo, Yugoslav expert Jason Vuic uproariously tells the story of the car that became an international joke: The American CEO who happens upon a Yugo right when his company needs to find a new import or go under. A State Department eager to aid Yugoslavia's nonaligned communist

hole left by Detroit in the  
cheap subcompact market  
that creates a race to the  
bottom that leaves the Yugo  
. . . at the bottom.

The most radical of Citroen's  
idiosyncratic offerings, the DS  
was sensational when it was  
introduced in 1955. Twenty  
years and 1.45 million cars later  
it was still technically advanced  
to most other cars. Revolutionary  
in driving characteristics and  
comfort, it remains one of the  
most innovative cars of all time.

"Nissan Z: 50 Years of Exhilarating Performance is a handsomely illustrated coffee-table book celebrating five decades of Nissan's immensely popular Z-Cars, from the ground-breaking

1970 240Z to today's top-performing 370Z, including the 50th anniversary Z. The story begins with the introduction of Nissan's (then Datsun) first foray into the sports-car world, the Datsun Roadster then gets into the details regarding the creation of the legendary 240Z. Each derivative is explored: including 260Z, 280Z, 280ZX, 300ZX through today's 370Z.

Nissan's Z is one of the few sports car models to be in production for 50 years, and Nissan Z pays fitting tribute to its proud heritage"--

definitive illustrated history. The Citroën 2CV 'One of the best books yet written on data and algorithms. . .deserves a place on the bestseller charts.' (The Times) You are accused of a crime. Who would you rather determined your fate - a human or an algorithm? An algorithm is more consistent and less prone to error of judgement. Yet a human can look you in the eye before passing sentence. Welcome to the age of the algorithm, the story of a not-too-distant future where machines rule supreme, making important decisions - in healthcare, transport, finance, security, what we watch, where we go even who we send to prison. So how much should we rely on them? What kind of future do we want? Hannah Fry

takes us on a tour of the good, the bad and the downright ugly of the algorithms that surround us. In Hello World she lifts the lid on their inner workings, demonstrates their power, exposes their limitations, and examines whether they really are an improvement on the humans they are replacing.
