

Yeah, reviewing a book Fk Knows Shailendra Singh could increase your near friends listings. This is just one of the solutions for you to be successful. As understood, achievement does not recommend that you have fantastic points.

Comprehending as capably as deal even more than extra will offer each success. bordering to, the notice as competently as sharpness of this Fk Knows Shailendra Singh can be taken as well as picked to act.

Omics Technologies and Bio-engineering Springer Nature

Omics Technologies and Bio-Engineering: Towards Improving Quality of Life, Volume 1 is a unique reference that brings together multiple perspectives on omics research, providing in-depth analysis and insights from an international team of authors. The book delivers pivotal information that will inform and improve medical and biological research by helping readers gain more direct access to analytic data, an increased understanding on data evaluation, and a comprehensive picture on how to use omics data in molecular biology, biotechnology and human health care. Covers various aspects of biotechnology and bio-engineering using omics technologies. Focuses on the latest developments in the field, including biofuel technologies. Provides key insights into omics approaches in personalized and precision medicine. Provides a complete picture on how one can utilize omics data in molecular biology, biotechnology and human health care.

High Voltage Engineering Cambridge University Press

This book presents high-quality, original contributions (both theoretical and experimental) on software engineering, cloud computing, computer networks & internet technologies, artificial intelligence, information security, and database and distributed computing. It gathers papers presented at ICRC 2019, the 2nd International Conference on Recent Innovations in Computing, which was held in Jammu, India, in March 2019. This conference series represents a targeted response to the growing need for research that reports on and assesses the practical implications of IoT and network technologies, AI and machine learning, cloud-based e-Learning and big data, security and privacy, image processing and computer vision, and next-generation computing technologies.

Business Organization and Management Springer

This book gathers high-quality papers presented at the International Conference on Smart Trends for Information Technology and Computer Communications (SmartCom 2020), organized by the Global Knowledge Research Foundation (GR Foundation) from 23 to 24 January 2020. It covers the state-of-the-art and emerging topics in information, computer communications, and effective strategies for their use in engineering and managerial applications. It also explores and discusses the latest technological advances in, and future directions for, information and knowledge computing and its applications.

Tuberculosis of the Central Nervous System Tata McGraw-Hill Education
Volume Three offers 1643 annotated records on publications regarding the art and archaeology of South Asia, Central Asia and Tibet selected from the ABIA Index database at www.abia.net which were published between 2002 and 2007.

Recent Innovations in Computing Springer

This book disseminates the current knowledge of semiconductor physics and its applications across the scientific community. It is based on a biennial workshop that provides the participating research groups with a stimulating platform for interaction and collaboration with colleagues from the same scientific community. The book discusses the latest developments in the field of III-nitrides; materials & devices, compound semiconductors, VLSI technology, optoelectronics, sensors, photovoltaics, crystal growth, epitaxy and characterization, graphene and other 2D materials and organic semiconductors.

Hot Heads and Dash of Hell University of Illinois Press

This book constitutes the refereed proceedings of the First International Conference on Futuristic Trends in Network and Communication Technologies, FTNCT 2018, held in Solan, India, in February 2018. The 37 revised full papers presented were carefully reviewed and selected from 239 submissions. The prime aim of the conference is to invite researchers from different domains of network and communication technologies to a single platform to showcase their research ideas. The selected papers are organized in topical sections on communication technologies, Internet of Things (IoT), network technologies, and wireless networks.

Seed Spices CRC Press

The book compiles the research works related to smart solutions concept in context to smart energy systems, maintaining electrical grid discipline and resiliency, computational collective intelligence consisted of interaction between smart devices, smart environments and smart interactions, as well as information technology support for such areas. It includes high-quality papers presented in the International Conference on Intelligent Computing Techniques for Smart Energy Systems organized by Manipal University Jaipur. This book will motivate scholars to work in these areas. The book also prophesies their approach to be used for the business and the humanitarian technology development as research proposal to various government organizations for funding approval.

The Marketing Book Harper Collins

This book of "Seed Spices" is the concise compilation of scientific information in a bridged form on seed spices production technologies. The book has been divided in to fourteen chapters covering all the cultivation aspects of major and minor seed spices. The efforts have been made to incorporate latest production, protection and postharvest technologies of seed spices developed and generated at ICAR-NRCSS, Ajmer and other research and development organization working under the umbrella of AICRP on spices. It is hoped that the book will be of interest and benefit the researchers, students, development workers, teachers, policy makers, and all interested in seed spices.

Manufacturing Advantage Academic Press

This open access book presents the proceedings of the 3rd Indo-German Conference on Sustainability in Engineering held at Birla Institute of Technology and Science, Pilani, India, on September 16–17, 2019. Intended to foster the synergies between research and education, the conference is one of the joint activities of the BITS Pilani and TU Braunschweig conducted under the auspices of Indo-German Center for Sustainable Manufacturing, established in 2009. The book is divided into three sections: engineering, education and entrepreneurship, covering a range of topics, such as renewable energy forecasting, design & simulation, Industry 4.0, and soft & intelligent sensors for energy efficiency. It also includes case studies on lean and green manufacturing, and life cycle analysis of ceramic products, as well as papers on teaching/learning methods based on the use of learning factories to improve students' problem-solving and personal skills. Moreover, the book discusses high-tech ideas to help the large number of unemployed engineering graduates looking for jobs become tech entrepreneurs. Given its broad scope, it will appeal to academics and industry professionals alike.

Sensors for Automotive and Aerospace Applications Springer Nature

This book provides a comprehensive overview of recent novel coronavirus (SARS-CoV-2) infection, their biology and associated challenges for their treatment and prevention of novel Coronavirus Disease 2019 (COVID-19). Discussing various aspects of COVID-19 infection, including global epidemiology, genome organization, immunopathogenesis, transmission cycle, diagnosis, treatment, prevention, and control strategies, it highlights host-pathogen interactions, host immune response, and pathogen immune invasion strategies toward developing an immune intervention or preventive vaccine for COVID-19. An understanding of the topics covered in the book is imperative in the context of designing strategies to protect the human race from further losses and harm due to SARS-CoV-2 infection causing COVID-19.

Handbook of Research on Machine and Deep Learning Applications for Cyber Security

Springer

While technology is developing at a fast pace, urban planners and cities are still behind in finding effective ways to use technology to address citizen's needs. Multiple aspects of sustainable urbanism are brought together in this book, along with advanced technologies and their connections to urban planning and management. It integrates urban studies, smart cities, AI, IoT, remote sensing, and GIS. Highlights include land use planning, spatial planning, and ecosystem-based information to improve economic opportunities. Urban planners and engineers will understand the use of AI in disaster management and the use of GIS in finding suitable landfill sites for sustainable waste management. Features Explains the process of urban heritage conservation, including the process of urban renewal and its regeneration and the role of citizens in urban renewal, planning, and management. Includes several case studies highlighting urban environmental problems and challenges in developed and developing countries and the ways for converting urban areas into smart cities. Focuses on urban resources, the supply of energy in smart cities, and their proper management practices. Introduces the role of remote sensing, GIS, and IoT in making a smart city and meeting sustainable goals. Analyzes unique case studies, their challenges and obstacles, and proposes a set of factors to understanding smart city initiatives and projects.

Advances in Urbanism, Smart Cities, and Sustainability IUCN

The Marketing Book is everything you need to know but were afraid to ask about marketing. Divided into 25 chapters, each written by an expert in their field, it's a crash course in marketing theory and practice. From planning, strategy and research through to getting the marketing mix right, branding, promotions and even marketing for small to medium enterprises. This classic reference from renowned professors Michael Baker and Susan Hart was designed for student use, especially for professionals taking their CIM qualifications. Nevertheless, it is also invaluable for practitioners due to its modular approach. Each chapter is set out in a clean and concise way with plenty of diagrams and examples, so that you don't have to dig for the information you need. Much of this long-awaited seventh edition contains brand new chapters and a new selection of experts to bring you bang up to date with the latest in marketing thought. Also included are brand new content in direct, data and digital marketing, and social marketing. If you're a marketing student or practitioner with a question, this book should be the first place you look.

Advances in Computing and Data Sciences Daya Publishing House

Funny and candid, yet rich in insights on how to really live life on your own terms, this unconventional self-help manual is unlike any book around. What do you want from life? Are you on the right track? Are you truly happy? If your answer to these questions is F?@k knows!, then this book is for you. Find the answers to life's most important questions with the help of uber-successful entrepreneur, Shailendra Singh, co-founder of Percept and inceptor of Sunburn. Told with sparkling, flavourful and in-your-face humour, this book will advise you on how to: Find yourself (Because you're probably lost. Admit it.) Follow your heart (Because if you don't then you'll die unhappy, you stupid f?@ker.) Achieve your goals (You know you want to.) Live life like you give a f?@k (Because...why not?) Candid and thoughtful, F?@k Knows will show you how to really live life on your own terms, to do what you want to do and not what you have to do just because your father said so!

Periodontal Disease and Overall Health Rupa Publications India

This book provides a thorough reappraisal of Status Epilepticus, the severest expression of epilepsy. In the light of modern research it rigorously examines current treatment, critically challenging existing tenets. A scheme of classification is proposed based not solely on seizure type but also on age, pathophysiological mechanisms and clinical features, considering where possible the clinical aspects of status in the context of their scientific basis, whether this is epidemiology, neurophysiology, neuropathology or neuropharmacology. A practical bias is maintained throughout, based on clinical experience, with greatest space devoted to treatment, including reviews of efficacy and toxicity of individual drugs and helpful use of tables to clearly summarize key information. This is a uniquely comprehensive review of the large volume of published literature in this field and will act as an invaluable reference work and practical guide for a wide range of practising clinicians, from neurologists, psychiatrists and paediatricians right through to those involved primarily in emergency medicine.

The Physics of Semiconductor Devices Routledge

This book is a collection of select papers presented at the Tenth Structural Engineering Convention 2016 (SEC-2016). It comprises plenary, invited, and contributory papers covering numerous applications from a wide spectrum of areas related to structural engineering. It presents contributions by academics, researchers, and practicing structural engineers addressing analysis and design of concrete and steel structures, computational structural mechanics, new building materials for sustainable construction, mitigation of structures against natural hazards, structural health monitoring, wind and earthquake engineering, vibration control and smart structures, condition assessment and performance evaluation, repair, rehabilitation and retrofit of structures. Also covering advances in construction techniques/ practices, behavior of structures under blast/impact loading, fatigue and fracture, composite materials and structures, and structures for non-conventional energy (wind and solar), it will serve as a valuable resource for researchers, students and practicing engineers alike.

Current Topics in Neglected Tropical Diseases Springer

There are a lot of e-business security concerns. Knowing about e-business security issues will likely help overcome them. Keep in mind, companies that have control over their e-business are likely to prosper most. In other words, setting up and maintaining a secure e-business is essential and important to business growth. This book covers state-of-the-art practices in e-business security, including privacy, trust, security of transactions, big data, cloud computing, social network, and distributed systems.

Futuristic Trends in Network and Communication Technologies Springer Nature

This book presents a comprehensive overview of the use of microorganisms and microbial metabolites as a future sustainable basis of agricultural, environmental and industrial developments. It provides a holistic approach to the latest advances in the utilization of various microorganism bioprospecting including their wide range of applications, traditional uses, modern practices, and designing strategies to harness their potential. In addition, it highlights advanced microbial bioremediation approaches, including genetic manipulation, metagenomics analysis and bacteriophage-based sensors for the detection of food-borne pathogens. Lastly, it elaborates on the latest advances regarding the role of microbes in the sustainable development of various industrial products.

Mycotoxins Springer

The book discusses the complex interactions between plants and their associated microbial communities. It also elucidates the ways in which these microbiomes are connected with the plant system, and how they affect plant health. The different chapters describe how microbiomes affect plants with regard to immunity, disease conditions, stress management and productivity. In addition, the book describes how an 'additional plant genome' functions as a whole organ system of the host, and how it presents both challenges and opportunities for the plant system. Moreover, the book includes a dedicated section on using omics tools to understand these interactions, and on exploiting them to their full potential.

Status Epilepticus BRILL

This book features selected papers presented at the 3rd International Conference on Recent Innovations in Computing (ICRIC 2020), held on 20–21 March 2020 at the Central University of Jammu, India, and organized by the university's Department of Computer Science & Information Technology. It includes the latest research in the areas of software engineering, cloud computing, computer networks and Internet technologies, artificial intelligence, information security, database and distributed computing, and digital India.

Advanced Data Structures BoD – Books on Demand

This volume covers the various sensors related to automotive and aerospace sectors, discussing their properties as well as how they are realized, calibrated and deployed. Written by experts in the field, it provides a ready reference to product developers, researchers and students working on sensor design and fabrication, and provides perspective on both current and future research.
