A motion tween is a type of Flash-generated animation in CS6 that requires the use of symbols and is best for creating movement, size, and rotation changes, fades, and color effects. All you need to do is tell Flash where to change the appearance of a symbol instance, and it fills in the blanks in between key changes in the symbol 's appearance to create an animation sequence.

This is tutorial about motion guide
animation for Adobe Flash. Just the basic to
make a motion guide on your flash project
Easy explanation of motion guide

animation in Flash CS3 ...

The guide shows you, how to add a motion
guide by selecting a key frame and drawing
it in. Then you will learn how to snap the
object to your guide line, and add motion to
it by selecting another key frame between
the first and last frames, and snapping the
object to the line in another location.

When the Convert to Symbol dialog box
appears, select Graphic from the Type drop-
down list and enter a name for the symbol
in the Name text box. Create another new
layer on the Timeline, select the Pencil tool
in the Tools panel, and select a stroke color
from the Property inspector on the right.
Make sure that Object Drawing mode is
turned off.
