Flashing check engine light - 2007 Ford Edge jerking v6-3...

Check engine light flashing car shaking is a clear sign of trouble. Vibration or shaking may be caused by misfires, poor fuel pressure, or faulty spark plugs. You should also know that a defective idle air control valve might make the engine idle drop significantly. This may cause the motor to vibrate or shake abnormally.

## Why is My Check Engine Light Flashing and Car Shaking?

A flashing check-engine light generally indicates that there is a failure in the emission control system. The emission control system contains an array of sensors that work to reduce the amount of pollution released into the air. An oxygen sensor reads the air and fuel mixture and lights up when it is out of range.

When the check engine light flashes continuously, it means you have a critical problem that will cause serious damage if neglected. Usually, this originates in a misfire that allows fuel to pass into the exhaust manifold and down to the catalytic converter where high temperatures ignite the fuel.

## Troubleshooting Ford Check Engine Light | YOU CANIC

When the Check Engine or Service Engine Soon light starts blinking (as opposed to staying steadily illuminated), this means that a catalytic converter-damaging condition is occurring. Usually you will be able to feel a noticeable difference in the way your vehicle is running.

[Why Is My Check Engine Light Flashing? | It Still Runs](#)

When a Ford vehicle displays a flashing Check Engine Light on the dashboard, this is an indication that your engine has a misfire. I would first recommend having your vehicle scanned for trouble codes with an OBD-2 scanner. This will help to determine which cylinder (s) are misfiring.

[My ford explorer is running very rough and when driving ...](#)

Sometimes a blinking check engine light

that does not stay on indicates that the catalytic converter is starting to go and would need replacing. Another area to look at would be the EGR system, tubes and EGR get clogged and need cleaning out.

A low oil level may cause your check engine light to turn on because driving with a low oil level can cause engine damage. Refer to your vehicle owner's manual to find out how to check the engine oil. You may also like: What's included with a Ford

multi-point vehicle inspection? Is it something more serious? If the gas cap and engine oil level are fine, the check engine light could mean a more serious problem, such as: Damaged spark plugs, wires, or coils; Issues with the thermostat **What It Means When a Check Engine Light Is On or Flashing ...**

When the engine light is flashing, it means that there is a problem with the engine and there is a trouble code stored in your engine control module. Usually, the engine light is not flashing, but when the engine light is flashing, it means that a problem with the engine is occurring at that moment and it's a more serious problem like a misfire.

### **What does your Ford check engine light mean?**

A flashing check engine light is your Ford F150's way of saying "I have a serious problem, don't ignore me". Most of the time, that serious problem is a misfire. This flashing light should not be ignored. When your engine is misfiring, it is dumping raw fuel into the exhaust.

### **2012 Ford Fusion Check Engine Light Flashing**

A flashing Check Engine Light indicates that your vehicle's engine is in serious trouble, whereas a steadily lit one means less urgent service is needed. Regardless, it's easy to find out what the issue is, and taking care of it quickly can save you money, and prevent further damage down to the road. ...

Going up hills the check engine light flashes. I have to take my foot off the gas pedal in order for the light to stop flashing. Lately the light has been flashing more frequently and is taking longer than normal to stop. Also I have a coolant leak on the right side under the bumper. Had a diagnostic check and it said it was a vacuum leak.
