Codex Sinaiticus is one of the world's most remarkable books. Written in Greek in the fourth century, it is the oldest surviving complete New Testament, and one of the two oldest manuscripts of the whole Bible. No other early manuscript of the Christian Bible has been so extensively corrected, and the significance of Codex Sinaiticus for the reconstruction of the Christian Bible's original text, the history of the Bible and the history of western book making is immense. Since 2002, a major international project has been creating an electronic version of the manuscript. This magnificent printed facsimile reunites the text, now divided between the British Library, the National Library of Russia, St Catherine's Monastery, Mt Sinai and Leipzig University Library.

Tom and Luna live down the street from Daniel Hume, a sadistic serial killer. As Luna begins to suspect that something insidious is happening within the Hume residence, she grows increasingly aware of her own sense of powerlessness. However, she begins to undergo a transformation. Rife with psychological insight, *Daydreams of Seppuku* is a bittersweet literary thriller that serves as a chronicle of fatalism and inertia, violence and depravity, awakening, and catharsis. In this work, Alisha Adkins has produced a shockingly graphic, profoundly disturbing tale, but has instilled within it a hint of magic realism, delicate and poignant subtlety, symbolism, and an uplifting message of hope for personal empowerment and salvation.

Kate Winters has won immortality. But if she wants a life with Henry in the Underworld, she'll have to fight for it. Becoming immortal wasn't supposed to be the easy part. Though Kate is about to be crowned Queen of the Underworld, she's as isolated as ever. And despite her growing love for Henry, ruler of the Underworld, he's becoming ever more distant and secretive. Then, in the midst of Kate's coronation, Henry is abducted by the only being powerful enough to kill him: the King of the Titans. As the other gods prepare for a war that could end them all, it is up to Kate to save Henry from the depths of Tartarus. But in order to navigate the endless caverns of the Underworld, Kate must enlist the help of the one person who is the greatest threat to her future. Henry's first wife, Persephone.

What would happen if you started listening to your cravings instead of trying to silence them? If you're tired of the same old messages of eat less and move more, this book is what you've been missing. You know "how to" get healthy... but now there's finally a book to help you find your "want to" - the lasting emotional and spiritual motivation to meet your goals and stay healthy. The reality is we were made to crave. Craving isn't a bad thing. But we must realize God created us to crave more of him. Many of us have misplaced that craving by overindulging in physical pleasures instead of lasting spiritual satisfaction. New York Times bestselling author of *It's Not Supposed to Be This Way*, *Uninvited*, and *The Best Yes*, Lysa TerKeurst, invites you to find the missing link between a woman's desire to be healthy and the spiritual empowerment necessary to make that happen. In this book, Lysa will help you: Break the cycle of "I'll start again Monday" and feel good about yourself today. Stop agonizing over numbers on the scale and make peace with your body. Replace rationalizations that lead to failure with wisdom that leads to victory. Reach your healthy goals and grow closer to God through the process. This is not a how-to book. This is not the latest and greatest dieting plan. This book is the necessary companion for you to use alongside whatever healthy lifestyle plan you choose. This is a book and Bible study to help you find the "want to" in making healthy lifestyle choices.

Implement machine learning and deep learning methodologies to build smart, cognitive AI projects using Python Key FeaturesA go-to guide to help you master AI algorithms and concepts8 real-world projects tackling different challenges in healthcare, e-commerce, and surveillanceUse TensorFlow, Keras, and other Python libraries to implement smart AI applicationsBook Description This book will be a perfect companion if you

want to build insightful projects from leading AI domains using Python. The better than ever. More than just a diet, Dr. Abravanel's one-of-a-kind plan is book covers detailed implementation of projects from all the core disciplines of AI. We start by covering the basics of how to create smart systems using machine learning and deep learning techniques. You will assimilate various neural network architectures such as CNN, RNN, LSTM, to solve critical new world challenges. You will learn to train a model to detect diabetic retinopathy conditions in the human eye and create an intelligent system for performing a video-to-text translation. You will use the transfer learning technique in the healthcare domain and implement style transfer using GANs. Later you will learn to build AI-based recommendation systems, a mobile app for sentiment analysis and a powerful chatbot for carrying customer services. You will implement AI techniques in the cybersecurity domain to generate Captchas. Later you will train and build autonomous vehicles to self-drive using reinforcement learning. You will be using libraries from the Python ecosystem such as TensorFlow, Keras and more to bring the core aspects of machine learning, deep learning, and AI. By the end of this book, you will be skilled to build your own smart models for tackling any kind of AI problems without any hassle. What you will learnBuild an intelligent machine translation system using seq-2-seq neural translation machinesCreate AI applications using GAN and deploy smart mobile apps using TensorFlowTranslate videos into text using CNN and RNNImplement smart AI Chatbots, and integrate and extend them in several domainsCreate smart reinforcement, learning-based applications using Q-LearningBreak and generate CAPTCHA using Deep Learning and Adversarial Learning Who this book is for This book is intended for data scientists, machine learning professionals, and deep learning practitioners who are ready to extend their knowledge and potential in AI. If you want to build real-life smart systems to play a crucial role in every complex domain, then this book is what you need. Knowledge of Python programming and a familiarity with basic machine learning and deep learning concepts are expected to help you get the most out of the book

A dazzling eco-thriller set in a terrifying world with some chilling similarities to our own... 17-year-old Banyan is a tree builder. Using salvaged scrap metal, he creates forests for rich patrons who seek a reprieve from the desolate landscape. Although Banyan's never seen a real tree--they were destroyed more than a century ago--his missing father used to tell him stories about the Old World. Everything changes when Banyan meets a mysterious woman with a strange tattoo, a map to the last living trees on earth, and he sets off across a wasteland from which few return. Those who make it past the pirates and poachers can't escape the locusts... the locusts that now feed on human flesh. But Banyan isn't the only one looking for the trees, and he's running out of time. Unsure of whom to trust, he's forced to make an alliance with Alpha, a beautiful, dangerous pirate with an agenda of her own. As they race towards a promised land that might only be a myth, Banyan makes shocking discoveries about his family, his past, and how far people will go to bring back the trees.

In New Orleans, a zombie outbreak brings carnival carnage, Mardi Gras mayhem, and zombies on parade. Susan is a tourist visiting New Orleans to have some fun, but she may never go home again. Jeremiah is an elderly shopkeeper pragmatically trying to wait out the zombie apocalypse as if it were another hurricane, and James is a young man who, along with his girlfriend, tries to make the best of a bad situation by conducting volunteer rescues around the city. Following these three survivors through the early days of the zombie apocalypse, *Zombie Gras* is a darkly humorous parable that chillingly parallels the strife wrought by Hurricane Katrina and champions the resilience of the city's spirit.

Follows a Black woman's forty-year career in academia, sharing how race and gender can disrupt and enhance the professional and the personal, from leadership and policies to family life. In *Sisterlocking Discoarse*, hair is a medium for reflecting on how academic leadership looks, performs, and changes when embodied by a Black woman. In these ten essays, Valerie Lee traverses disciplines and genres, weaving together memoir, literary analysis, legal cases, folklore, letters, travelogues, family photographs, and cartoons to share her story of navigating academia. Lee's path is not singular or linear, but rather communal and circular as she revisits her earliest years in her grandmother's home, advances through the professoriate and senior administration, and addresses her hopes and fears for her own children. Drawing inspiration from the African American storytelling traditions she has spent decades studying and teaching, Lee approaches issues of race, gender, social justice, academic labor, and leadership with a voice that is clear, intimate, and humorous. As she writes in the introduction, "Sisterlocking Discoarse is about braiding and breathing and believing that a Black woman's journey through the academy is important." Lee's journey will appeal to students, faculty, and administrators across fields and institutions who are committed to making higher education more inclusive, while speaking to the experiences of professional women of color more broadly. Valerie Lee is Professor Emerita of English at The Ohio State University. She is the author of *Granny Midwives* and *Black Women Writers: Double-Dutched Readings* and the editor of *The Prentice Hall Anthology of African American Women's Literature*.
