License Administration

Guide - SlickEdit

FLEXnet-licensed
applications can either be
counted or uncounted.

Counted means that a license
manager is needed to allow
for license checkout.

Uncounted licenses do not
use a license manager; rather,
license management depends
solely on the contents of the
license file. When you run a
counted FLEXnet-licensed

application, the following
occurs:

Guide: Version 10.8:

It explains where license administrators have control and where end-users have control. A section called 'Getting Started Checklist' on page 6 tells both license administrators and end-users how to start managing FLEXlm. 1.1 Introduction to FLEXlm. FLEXlm is the most popular license manager used in the software industry.

License Administration Guide - utoledo.edu

The Imgrd program is the main daemon program for FLEXnet Licensing. When you invoke Imgrd, the program looks for a license file that contains information about vendors and features. On Linux platforms it is recommended that you run Imgrd as a non-privileged user (not root).. See The FLEXnet Licensing End User Guide Version for more information on FLEXnet Licensing.
