From a master biographer, the life story of the daring French aviator who became one of the twentieth century's most beloved authors Antoine de Saint-Exupéry disappeared at age forty-four during a reconnaissance flight over southern France. At the time he was best known for a career of daring flights over the Sahara, the Pyrenees, and Patagonia and for his contributions to the science of aviation. But the solitary hours he spent above the earth in open cockpit airplanes gave birth to a more famous legacy, a series of enchanting, autobiographical novels and the classic story *The Little Prince*, still the most translated book in the French language. An impoverished aristocrat from one of France's oldest families, Saint-Exupéry moved at age twenty-seven to the western Sahara Desert, to live alone in a plank shack and manage the way station for the Aéropostale, the French mail service. His careers as a novelist and an aviator

were born here, and his life once he returned to Europe was defined--with brilliant and catastrophic results--by the sense of isolated fascination and curiosity he developed in the desert. In this definitive biography, Pulitzer Prize winner Stacy Schiff reveals an intrepid and unconventional life that rivals the best adventure stories.

The Winged Life HMH

Fasten your seatbelt to experience the spectacle and solitude of flying high in the Andes in this novel from the author of *The Little Prince*. No writer has equaled Saint-Exupéry in describing the perilous and poetic experience of flying, in submission to what he calls "those damn elemental divinities—night, day, mountain, sea and storm." In this gripping, beautifully written novel inspired by his experience as a pilot in South America, he tells of the brave men who pilot night mail planes from Patagonia, Chile, and Paraguay to Argentina in the early days of commercial aviation. They are impelled to perform their routine acts of heroism by a steely chief named Rivière, whose extraordinary character is revealed through the dramatic events of a single night. Preface by André Gide. Translated by Stuart Gilbert. "The book stands out by reason of the quality of its style, the beauty of the passages in which flight is described better than it ever has been before, but more especially because of the emotions of the men of heroic mold."—André Maurois, *Saturday Review*

Lamotte. "Flight to Arras" is a memoir by French author Antoine de Saint-Exupery. Written in 1942, it recounts his role in the French Air Force as pilot of a reconnaissance plane during the Battle of France in 1940. The book condenses months of flights into a single terrifying mission over the town of Arras. Saint-Exupery was assigned to Reconnaissance Group II/33 flying the twin-engine Bloch MB.170. At the start of the war there were only fifty reconnaissance crews, of which twenty-three were in his unit. Within the first few days of the German invasion of France in May 1940, seventeen of the II/33 crews were sacrificed recklessly, he writes "like glasses of water thrown onto a forest fire." Saint-Exupery survived the French defeat but refused to join the Royal Air Force over political differences with de Gaulle and in late 1940 went to New York where he accepted the National Book Award for "Wind, Sand and Stars." He remained in North America for two years, and then in the spring of 1943 rejoined his old unit in North Africa. In July 1944, "risking flesh to prove good faith," he failed to return from a reconnaissance mission over France." A Guide for Grown-ups Penn State Press

Peter S í s's remarkable biography *The Pilot and the Little Prince* celebrates the author of *The Little Prince*, one of the most beloved books in the world. Antoine de Saint-Exup é ry was born in France in 1900, when airplanes were just being invented. Antoine dreamed of flying and grew up to be a pilot—and that was when his adventures began. He found a job delivering mail by plane, which had never been done before. He and his fellow pilots traveled to faraway places and discovered new ways of getting from one place to the next. Antoine flew over mountains and deserts. He battled winds and storms. He tried to break aviation records, and sometimes he even crashed. From his plane, Antoine looked down on the earth and was inspired to write about his life and his pilot-hero friends in memoirs and in fiction. Discovering the Hidden Wisdom of The Little Prince Penguin UK

How he could now be forgotten seems unfathomable. Lewis Galanti guided Hemingway through his first years in Paris, when the author was unknown and desperate for recognition. He helped James Joyce and Sylvia Beach launch *Ulysses*; started John Houseman in his theatrical career; and saw Antoine de Saint-Exupéry through his wartime exile in America, as his friend and as his collaborator and translator in life and in print. He was a playwright, a literary and cultural critic and an author, Federal Reserve Bank economist throughout the Great Depression, director of the French Branch of the Office of War Information at the onset of World War II, ACLU Director during the McCarthyism-fraught 1950s, Counselor to Radio Free Europe and, at a crucial time in its history, president of PEN America, the writers advocacy organization. Yet, today, few know his name and, to those who do, he is a cipher...And that was precisely his intent. The son of Jewish Latvian immigrants at a time of rampant anti-semitism, Lewis spent his first thirteen years in Chicago's tenements and did not complete grade school. Yet, by his early twenties, Lewis had convinced the world that he was the apostate son of French Catholic parents, and had earned degrees from French and German universities. Galanti's *re*, *The Lost Generation's Forgotten Man*, is both a historical chronicle providing rare insights into the lives of leading twentieth century figures (with previously unpublished personal correspondence from Hadley Hemingway and Alfred Knopf), and a meticulously researched biography. Galanti's *re* presents, for the first time, the seemingly magical story of the self-fabricated and fully-realized man, Lewis Galanti's *re*. *Wartime Writings 1939-1944* Houghton Mifflin Harcourt
In writing this book my collaborator and I had two aims in view. Firstly, to shed some light on the life and ideas of a complex, gifted and fascinating individual; a man whose life was packed with adventure, both in the realms of action and in the realms of

thought; who was pioneer airman, writer, poet, philosopher, administrator, mathematician, scientist and practical inventor. Secondly, and in so doing, to say something about that relatively new discovery -- flying; about the psychology of the airman; and about the beauty and interest of his profession.
