Whether covering what's new or what's next, SPIN is your monthly VIP pass to all that rocks.

YouTube and Video Marketing John Wiley & Sons

"Today on Oprah," intoned the TV announcer, and all over America viewers tuned in to learn, empathize,

and celebrate. In this book, Kathryn Lofton investigates the Oprah phenomenon and finds in Winfrey's empire—Harpo Productions, O Magazine, and her new television network—an uncanny reflection of religion in modern society. Lofton shows that when Oprah liked, needed, or believed something, she offered her audience nothing less than spiritual revolution, reinforced by practices that fuse consumer behavior, celebrity ambition, and religious idiom. In short, Oprah Winfrey is a media messiah for a secular age. Lofton's unique approach also situates the Oprah enterprise culturally, illuminating how Winfrey reflects and continues historical patterns of American religions.

Your relationships with your "smart" products are about to get a lot more personal. Think how commonplace it is now for people to ask Siri for the weather forecast, deploy Roomba to clean their homes, or summon Alexa to turn on the lights. The "smart home" market will reach well over \$100 billion in the next five years on the promise of products that are truly integrated with our cooking, cleaning, entertainment, security, and hygiene habits. But the reality is, these first-generation "smart" products aren't very smart—yet. We're clearly seeing only the tip of the iceberg in terms of capability and how such products can enhance our lives. How do we take it to the next level? In a word, design—and more specifically, social design. In this fascinating and instructive book, leading product design expert Carla Diana describes how new technology is allowing designers to humanize consumer products in delightfully subtle ways. Showcasing vivid examples of social design principles such as "product presence," "object expression," and "interaction intelligence," we see how inventive uses of light, sound, and movement can evoke human responses to even the most mundane products. Diana offers clear guidelines and takeaways for conceptualizing, building, and optimizing products using such methods as bodystorming, scenario storyboarding, video prototyping, behavior charting, and more. My Robot Gets Me provides

keen insights and practical advice to anyone interested or involved in the burgeoning smart marketplace, from product designers and developers to managers and venture capitalists. PC Magazine Univ of California Press Mobile Technologies and Handheld Devices for Ubiquitous Learning: Research and Pedagogy provides readers with a rich collection of research-informed ideas for integrating mobile technologies into learning and teaching. Each chapter looks critically at the issues, related benefits and limitations of learning ubiquitously within the context of the research reported. New and emerging technologies present challenges for education causing educators to have to rethink pedagogy, boundaries and curriculum if they continue to embrace mobile technologies in their teaching. [Best Practices for Technology-Enhanced Teaching and Learning](#) St. Martin's Griffin Arguably the funniest novel to emerge from Northern Europe since the Black Death A reindeer strangler has struck again; the world's leading authority on Baltic sturgeon has been filleted, and the head of Sweden's only unpublished thriller writer has been discovered some meters from his body. Just a typical day in Stockholm's crime log? Or are the murders the works of a single killer? Chief Inspector Svenjamin Bubbles has a suspect: Lizzy Salamander, Scandinavia's most heavily tattooed girl-sociopath and hacker extraordinaire. Mikael Blomberg believes Salamander has been framed. But if Salamander is innocent, who is the 4'10" girl ninja captured on a surveillance camera decapitating the failed novelist? And what has become of the unpublished manuscript that claimed to connect Sweden's most eco-friendly corporations to the twentieth century's greatest tyrant? A shocking story of corruption and perversion that reaches to the highest echelons of the world's largest producer of inexpensive ready-to-assemble wooden

bookcases, *The Girl with the Sturgeon Tattoo* delivers a hilarious—and gripping—parody of the best-selling novels by Stieg Larsson.

the information, it will turn your world around. " —David Robin, David Robin Films Teaching And Training In Lifelong Learning McGraw Hill

The use of technology and teaching techniques derived from technology is currently a burgeoning topic in higher education. Teachers at all levels and types of institutions want to know how these new technologies will affect what happens in and outside of the classroom. Many teachers have already embraced some of these technologies but remain uncertain about their educational efficacy. Other teachers have waited because they are reluctant to try tools or techniques that remain unproven or, as is often the case, lack institutional support. This book is designed to help both groups, so that those with technological expertise can extend their knowledge, while technological novices can "ramp up" at their own pace and for their own purposes. Best Practices for Technology-Enhanced Teaching and Learning brings together expert teacher-scholars who apply and assess technology's impact on traditional, hybrid or blended, or completely on-line courses, relying on technology as a teaching tool for classroom management and interaction (e.g., Blackboard, PowerPoint, student response or "clicker systems," multimedia tools), as well as student-based uses of technology largely independent of instructors (e.g., social networking on popular

sites including Facebook and MySpace). Each chapter will address how technological improvements can be connected to assessment initiatives, as is now routinely advocated in psychology and social science education. The book features current scholarship and pedagogy involving innovative technology that impacts on student learning in psychology and related disciplines, focusing also on student reactions to these novel technologies, and proper assessments of how well they promote learning. This text will serve as the standard reference on emerging technologies for undergraduate instructors.
