CAMCORDER -- DIGITAL(404). Oxford University Press This book is intended for scholars, researchers, and academic leaders who have a passion to share their knowledge outside their classroom, laboratory, or institution; who want to make a difference; and who believe that the information they possess and ideas they offer are important for a wider public. Pitch Perfect is a practical guide to communicating your knowledge and research to broader audiences. How do you get yourself heard amid the volume of news and information in today's 24-hour news cycle, and get your message across in an environment where blogs and Twitter vie with traditional media? To break through, you need to amplify your ideas and make them relevant for a wider public audience. Bill Tyson – who has been successfully advising scholars and academic leaders on media relations for over 30 years – shows you how to undertake early and thoughtful communications planning, understand the needs and workings of the media, both traditional and digital, and tell your story in a way that will capture your audience. Bill Tyson is strategic in his advice, no less so when discussing how to engage with such social media as blogs, Facebook, Twitter, YouTube, podcasts or wikis. Whether you are working on research or a new initiative that has public implications, or have a story that deserves wide telling; whether you want to address funders' requests for communications plans to promote the programs they are supporting, or whether you want to know how to publicize your new book; this practical guide offers insider advice – complete with case studies – on how to communicate your message. An appendix lists key media in North America, Australia, and the UK.

Your relationships with your "smart" products are about to get a lot more personal. Think how commonplace it is now for people to ask Siri for the weather forecast, deploy Roomba to clean their homes, or summon Alexa to turn on the lights. The "smart home" market will reach well over $100 billion in the next five years on the promise of products that are truly integrated with our cooking, cleaning, entertainment, security, and hygiene habits. But the reality is, these first-generation "smart" products aren't very smart—yet. We're clearly seeing only the tip of the iceberg in terms of capability and how such products can enhance our lives. How do we take it to the next level? In a word, design—and more specifically, social design. In this fascinating and instructive book, leading product design expert Carla Diana describes how new technology is allowing designers to humanize consumer products in delightfully subtle ways. Showcasing vivid examples of social design principles such as "product presence," "object expression," and "interaction intelligence," we see how inventive uses of light, sound, and movement can evoke human responses to even the most mundane products. Diana offers clear guidelines and takeaways for conceptualizing, building, and optimizing products using such methods as bodystorming, scenario storyboarding, video prototyping, behavior charting, and more. My Robot

Gets Me provides keen insights and practical advice to anyone interested or involved in the burgeoning smart marketplace, from product designers and developers to managers and venture capitalists.

The use of technology and teaching techniques derived from technology is currently a bourgeoning topic in higher education. Teachers at all levels and types of institutions want to know how these new technologies will affect what happens in and outside of the classroom. Many teachers have already embraced some of these technologies but remain uncertain about their educational efficacy. Other teachers have waited because they are reluctant to try tools or techniques that remain unproven or, as is often the case, lack institutional support. This book is designed to help both groups, so that those with technological expertise can extend their knowledge, while technological novices can "ramp up" at their own pace and for their own purposes. Best Practices for Technology-Enhanced Teaching and Learning brings together expert teacher-scholars who apply and assess technology's impact on traditional, hybrid or blended, or completely on-line courses, relying on technology as a teaching tool for classroom management and interaction (e.g., Blackboard, PowerPoint, student response or "clicker systems," multimedia tools), as well as student-based uses of technology largely independent of instructors (e.g., social networking on popular sites including Facebook and MySpace). Each chapter will address how technological improvements can be connected to assessment initiatives, as is now routinely advocated in psychology and social science education. The book features current scholarship and pedagogy involving innovative technology that impacts on student learning in psychology and related disciplines, focusing also on student reactions to these novel technologies, and proper assessments of how well they promote learning. This text will serve as the standard reference on emerging technologies for undergraduate instructors.

Built on a strong foundation, Basic Marketing 18e with ConnectPlus and LearnSmart provides an integrated teaching and learning solution for presenting the four Ps framework and managerial orientation with a strategy planning focus. The Perreault franchise was the pioneer of the "four Ps" in the introductory marketing course. The unifying focus of Basic Marketing has always been on how to make marketing decisions in deciding what customers to focus on and how best to meet their needs. Consistent with our belief in continuous quality improvement, this edition has been critically revised, updated, and rewritten to reflect new concepts, new examples, recent "best practices," and to tightly integrate the best digital tools in the industry for ensuring that students are prepared to engage in classroom lectures and pursue future business and marketing careers.
