offering different focus modes, focus types, and focus points. A Photographer's Guide to Focus and Autofocus: From Snapshots to Great Shots is here to answer all your

questions about the autofocus sensor focusing system in today's cameras and their various autofocus modes. Photographer Alan Hess covers the simple basics of focus: manual focus versus autofocus, the best focus modes to use, and how focus works in both DSLRs and mirrorless cameras. Then he discusses more advanced topics, including

autofocus sensor types, back-button autofocus, and focus for DSLR video. Two experienced HR communications consultants show how to dramatically improve the effectiveness of every HR message. HR professionals know their programs are pivotal to organizational success, but they also know how difficult it is to communicate those programs effectively. Hampered by legal restrictions, highly complex policies and

programs, corporate politics, and old-fashioned notions about business communication, they create communications their audiences simply ignore. It needn't be that way! Alison Davis and Jane Shannon present simple, powerful principles and techniques every HR professional can use, even those who've never been comfortable as writers. Davis and

Shannon demonstrate how to treat employees as customers, and use the same strategies, tools, and care your company uses to sell its products or services. The authors help HR professionals understand their customers' (and executives') needs and motivations more clearly; package information to promote faster, better decision-making; and measure

---

their effectiveness. They present specific solutions for safely eliminating unnecessary detail and jargon; explaining benefits, pay, and policies; improving recruiting, orientation, and outplacement communications; supporting retirement planning; and improving performance management.
