<p>Mastering Assessment: A Self-Service System for Educators, 2/e (hereafter referred to as MA) is a set of 15 booklets intended to be the grist for a wide variety of professional development programs focused on educational assessment. Each of the MA booklets was deliberately written to permit a one-sitting or two-sittings reading by busy educators. The resultant brevity of the MA booklets, coupled with their being provided as separate documents, is intended to provide users of the MA system with considerable latitude in</p>	<p>determining how best to use the booklets. A Facilitator's Guide is available to guide educators in using the 15 booklets in their professional development programs and can be downloaded at no additional charge from Pearson's Instructor Resource Center. Florida Geometry End-of-Course Assessment Book + Online McDougal Littell

Under pressure and support from the federal government, states have increasingly turned to indicators based on student test scores to evaluate teachers and schools, as well as students

themselves. The focus thus far has been on test scores in those subject areas where there is a sequence of consecutive tests, such as in mathematics or English/language arts with a focus on grades 4-8. Teachers in these subject areas, however, constitute less than thirty percent of the teacher workforce in a district. Comparatively little has been written about the measurement of achievement in the other grades and subjects. This volume seeks to remedy this imbalance by focusing on the assessment of student achievement in a broad range of grade levels and subject areas,

with particular attention to their use in the evaluation of teachers and schools in all. It addresses traditional end-of-course tests, as well as alternative measures such as portfolios, exhibitions, and student learning objectives. In each case, issues related to design and development, psychometric considerations, and validity challenges are covered from both a generic and a content-specific perspective. The NCME Applications of Educational Measurement and Assessment series includes edited volumes designed to inform research-based applications of educational measurement and assessment.

Edited by leading experts, these books are comprehensive and practical resources on the latest developments in the field. The NCME series editorial board is comprised of Michael J. Kolen, Chair; Robert L. Brennan; Wayne Camara; Edward H. Haertel; Suzanne Lane; and Rebecca Zwick.

A leading economic historian traces the evolution of American capitalism from the colonial era to the present—and argues that we’ve reached a turning point that will define the era ahead. “A monumental achievement, sure to become a classic.” —Zachary D. Carter, author of *The Price of Peace* In this ambitious single-

volume history of the United States, economic historian Jonathan Levy reveals how capitalism in America has evolved through four distinct ages and how the country’s economic evolution is inseparable from the nature of American life itself. The Age of Commerce spans the colonial era through the outbreak of the Civil War, and the Age of Capital traces the lasting impact of the industrial revolution. The volatility of the Age of Capital ultimately led to the Great Depression, which sparked the Age of Control, during which the government took on a more active role in the economy, and finally, in the Age of Chaos, deregulation and the growth of the finance industry created a booming economy for

some but also striking inequalities and a lack of oversight that led directly to the crash of 2008. In *Ages of American Capitalism*, Levy proves that capitalism in the United States has never been just one thing. Instead, it has morphed through the country's history—and it's likely changing again right now.

“A stunning accomplishment . . . an indispensable guide to understanding American history—and what's happening in today's economy.” —Christian Science Monitor

“The best one-volume history of American capitalism.” —Sven Beckert, author of *Empire of Cotton*
