*Annual Report*  
Discover insider  
secrets of how  
America's  
transportation  
system is  
designed, funded,  
and built – and  
how to make it  
work for your  
community In  
Confessions of a  
Recovering  
Engineer:  
Transportation for  
a Strong Town,  
renowned speaker  
and author of  
Strong Towns  
Charles L.  
Marohn Jr.  
delivers an  
accessible and  
engaging  
exploration of  
America's

---

transportation system, laying bare the reasons why it no longer works as it once did, and how to modernize transportation to better serve local communities. You'll discover real-world examples of poor design choices and how those choices have dramatic and tragic effects on the lives of the people who use them. You'll also find case studies and examples of design improvements that have revitalized communities and improved safety. This important book shows you:

The values of the transportation professions, how they are applied in the design process, and how those priorities differ from those of the public. How the standard approach to transportation ensures the maximum amount of traffic congestion possible is created each day, and how to fight that congestion on a budget. Bottom-up techniques for spending less and getting higher returns on transportation projects, all while improving quality of life for residents. Perfect for anyone interested in why transportation systems work – and fail to work – the way they do, *Confessions of a Recovering Engineer* is a fascinating insider's peek behind the scenes of America's transportation systems.

*Year Book - Florida State Board of Professional Engineers and Land Surveyors*

In light of increasing economic and international threats, military operations must be

---

examined with a critical eye in terms of process design, management, improvement, and control. Although the Pentagon and militaries around the world have utilized industrial engineering (IE) concepts to achieve this goal for decades, there has been no single reso

**Proceedings of the ... Florida Highway Engineering Conference**

This course covers all of the standards in detail, giving you practical "real world" advice on

how to adhere to them and stay out of trouble. It includes explanations and examples of each standard, a technical view of boundary, topographic, construction, and record/as-built surveys and a checklist to follow for field and office procedures.
