"Textured Teaching is a framework for teaching and learning about texts, centered in love and social justice. The term social justice refers to a redistribution of resources, opportunities, wealth, and power that promotes equity. A teaching approach that strives for social justice, then, is one that openly addresses social injustices and functions in a way that leads students to reimagine an equitable redistribution. Our framework is built upon the values that a Textured Teacher must hold. The strategies we use to bring those values to life are the traits of Textured Teaching. Therefore, a thoughtful and intentional implementation of Textured Teaching leads to social justice work"--

Teachers facing the challenge of meeting the diverse reading needs of students will find the structure and tools they need in Jan Richardson's powerful approach to guided reading. Richardson has identified the essential components of an effective guided reading lesson: targeted assessments, data analysis that pinpoints specific strategies students need, and the use of guided writing to support the reading process. Each chapter contains planning sheets to help teachers analyze assessments in order to group students and select a teaching focus Includes detailed, ready-to-go lesson plans for all stages of reading: emergent, early, transitional, and fluent The Next Step in Guided Reading Independently Published Can your students analyze their own understanding of content?

[Distance Education Brighter Child](#)

Taken from "The Talented Tenth" written by W. E. B. Du Bois: The Negro race, like all races, is going to be saved by its exceptional men. The problem of education, then, among Negroes must first of all deal with the Talented Tenth; it is the problem of developing the Best of this race that they may guide the Mass away from the contamination and death of the Worst, in their own and other races. Now the training of men is a difficult and intricate task. Its technique is a matter for educational experts, but its object is for the vision of seers. If we make money the object of man-training, we shall develop money-makers but not necessarily men; if we make technical skill the object of education, we may possess artisans but not, in nature, men. Men we shall have only as we

make manhood the object of the work of the schools-intelligence, broad sympathy, knowledge of the world that was and is, and of the relation of men to it-this is the curriculum of that Higher Education which must underlie true life. On this foundation we may build bread winning, skill of hand and quickness of brain, with never a fear lest the child and man mistake the means of living for the object of life.
