Many Americans believe that people who lack health insurance somehow get the care they really need. Care Without Coverage examines the real consequences for adults who lack health insurance. The study presents findings in the areas of prevention and screening, cancer, chronic illness, hospital--based care, and general health status. The committee looked at the consequences of being uninsured for people suffering from cancer, diabetes, HIV infection and AIDS, heart and kidney disease, mental illness, traumatic injuries, and heart attacks. It focused on the roughly 30 million -- one in seven--working--age Americans without health insurance. This group does not include the population over 65 that is covered by Medicare or the nearly 10 million children who are uninsured in this country. The main findings of the report are that working-age Americans without health insurance are more likely to receive too little medical care and receive it too late; be sicker and die sooner; and receive poorer care when they are in the hospital, even for acute situations like a motor vehicle crash.

West's Florida Statutes Annotated

'Global insurance and its rapidly evolving law and regulation demands international research. To this aim, the Handbook offers a truly international collection of essays. Highly renowned experts analyze the key topics currently under international discussion and development. While representing a diversity of national jurisdictions, the focus lies on the largest insurance jurisdictions (USA, UK and Germany) but newly important jurisdictions like Brazil and China are considered as well a most valuable and important contribution to international insurance law literature.' Manfred Wandt, Director of the Insurance Law Institute, Goethe-University Frankfurt, Germany 'This Research Handbook is published at an opportune time. A global review of insurance law and regulation is underway. Much reform happens locally with little reference to developments elsewhere and this Research Handbook brings the strands together. It is a comprehensive review by distinguished authors from different backgrounds including both leading academics and practitioners. They consider the definitions of insurance, its economic underpinnings, comparative law and regulations, actual and proposed reforms, the effects on underwriting and claims and how insurance is studied and taught. Good laws and regulation benefit the market and its customers. Bad laws and regulation do the opposite. This book is required reading for all involved in the reform process.' David Hertzell, Law Commissioner 'Globalisation has had no greater impact in the commercial world than on insurance, the law which governs it and the risks it seeks to address. Those who inspired this publication and the contributing authors, are to be thanked for providing such a necessary and useful reference source. It covers so much of what insurance professionals need to be aware of in the insurance/law world of the twenty first century.' Michael Gill, President of the International Insurance Law Association Given its economic importance, insurance is a field that has been underserved as an area of academic study. This detailed book provides much needed coverage of insurance law and regulation in its international context. Produced in association with Lloyd's, it draws on the expertise both of academics and practising lawyers. Containing 30 comprehensive chapters, it provides in-depth studies on key areas, such as the role of international organisations, the judicial interpretation of insurance contract clauses and transnational regulatory recognition. It also provides thorough introductions to important jurisdictions, including the EU, US and Japan as well as focusing on newly emerging economies such as China and Brazil. Specialist topics covered include regulation by and of Lloyd's, the tort of bad faith in the US, microinsurance and takaful insurance.
