Bewilderment: A Novel
Sourcebooks, Inc.

A bestselling modern classic—both poignant and funny—narrated by a fifteen year old autistic savant obsessed with Sherlock Holmes, this dazzling novel weaves together an old-fashioned mystery, a contemporary coming-of-age story, and a fascinating excursion into a mind incapable of processing emotions. Christopher John Francis Boone knows all the countries of the world and their capitals and every prime number up to 7,057. Although gifted with a superbly logical brain, Christopher is autistic. Everyday interactions and admonishments have little meaning for him. At fifteen, Christopher’s carefully constructed world falls apart when he finds his neighbour’s dog Wellington impaled on a garden fork, and he is initially blamed for the killing. Christopher decides that he will track down the real killer, and turns to his favourite fictional character, the impeccably logical Sherlock Holmes, for inspiration. But the investigation leads him down some unexpected paths and ultimately brings him face to face with the dissolution of his parents’ marriage. As Christopher tries to deal with the crisis within his own family, the narrative draws

readers into the workings of Christopher’s mind. And herein lies the key to the brilliance of Mark Haddon’s choice of narrator: The most wrenching of emotional moments are chronicled by a boy who cannot fathom emotions. The effect is dazzling, making for one of the freshest debut in years: a comedy, a tearjerker, a mystery story, a novel of exceptional literary merit that is great fun to read.

Outcasts United Penguin
Depicting with humor and insight the pressure to be outwardly perfect, this novel for ages 10-13 shows how one girl develops compassion for her own and others’ imperfections. For 13-year-old Isabelle Lee, whose father has recently died, everything’s normal on the outside. Isabelle describes the scene at school with bemused accuracy--the self-important (but really not bad) English teacher, the boy that is constantly fixated on Ashley Barnum, the prettiest girl in class, and the dynamics of the lunchroom, where tables are turf in a all-eyes-open awareness of everybody’s relative social position. But everything is not normal, really. Since the death of her father, Isabelle’s family has only functioned on the surface. Her mother, who used to take care of herself, now wears only lumpy, ill-fitting clothes, cries all night, and has taken every picture of her dead husband and put them under her bed. Isabelle tries to make light of this, but the underlying tension is expressed in overeating and then binging. As the novel opens, Isabelle’s little sister, April, has told their mother about Isabelle’s problem. Isabelle is enrolled in group therapy. Who should show up there, too, but Ashley Barnum, the prettiest, most together girl in class.

One of the most widely used ethnographies published in the last twenty years, this Margaret Mead Award winner has been used as required reading at more than 600 colleges and universities. This personal account by a biocultural anthropologist illuminates not-soon-forgotten messages involving the sobering aspects of fieldwork among malnourished children in West Africa. With nutritional anthropology at its core, Dancing Skeletons presents informal, engaging, and oftentimes dramatic stories that relate the author’s experiences conducting research on infant feeding and health in Mali. Through fascinating vignettes and honest, vivid descriptions,

Dettwyler explores such diverse topics as ethnocentrism, culture shock, population control, breastfeeding, child care, the meaning of disability and child death in different cultures, female circumcision, women's roles in patrilineal societies, the dangers of fieldwork, and facing emotionally draining realities. Readers will laugh and cry as they meet the author's friends and informants, follow her through a series of encounters with both peri-urban and rural Bambara culture, and struggle with her as she attempts to reconcile her very different roles as objective ethnographer, subjective friend, and mother in the field. The 20th Anniversary Edition includes a 13-page "Q&A with the Author" in which Dettwyler responds to typical questions she has received individually from students who have been assigned *Dancing Skeletons* as well as audience questions at lectures on various campuses. The new 23-page "Update on Mali, 2013" chapter is a factual update about economic and health conditions in Mali as well as a brief summary of the recent political unrest.

A Rose for Emily Delacorte Press

An investigative journalist exposes the many holes in today's bestselling behavioral science, and argues that the trendy, TED-Talk-friendly psychological interventions that are so in vogue at the moment will never be enough to truly address social injustice and inequality. With their viral TED talks, bestselling books, and counter-intuitive remedies for complicated problems, psychologists and other social scientists have become the reigning thinkers of our time. Grit and "power posing" promised to help overcome entrenched inequalities in schools and the workplace; the Army spent hundreds of millions of dollars on a positive psychology intervention geared at preventing PTSD in its combat soldiers; and the implicit association test swept the nation on the strength of the claim that it can reveal unconscious biases and reduce racism in police departments and human resources departments. But what if much of the science underlying these blockbuster ideas is dubious or fallacious? What if Americans' longstanding preference for simplistic self-help platitudes is exerting a pernicious influence on the way behavioral science is communicated and even funded, leading respected

academics and the media astray? In *The Quick Fix*, Jesse Singal examines the most influential ideas of recent decades and the shaky science that supports them. He begins with the California legislator who introduced self-esteem into classrooms around the country in the 1980s and the Princeton political scientist who warned of an epidemic of youthful “superpredators” in the 1990s. In both cases, a much-touted idea had little basis in reality, but had a massive impact. Turning toward the explosive popularity of 21st-century social psychology, Singal examines the misleading appeal of entertaining lab results and critiques the idea that subtle unconscious cues shape our behavior. As he shows, today’s popular behavioral science emphasizes repairing, improving, and optimizing individuals rather than truly understanding and confronting the larger structural forces that drive social ills. Like Anand Giridharadas’s *Winners Take All*, *The Quick Fix* is a fresh and powerful indictment of the thought leaders and influencers who cut corners as they sell the public half-baked solutions to problems that deserve more serious treatment. *The Chosen Gallery* / Saga Press

During the late Victorian period, Charles Darwin's theories took the world by storm, and the impact of evolution on research into the developing human mind was impossible to overlook. Thereafter the study of children and childhood became a means to theorize, imagine, and apply the concept of evolution in a broad range of cultural productions. Beginning with the watershed Victorian era, *From Alice to Algernon: The Evolution of Child Consciousness in the Novel* examines the creative transformation these theories underwent as they filtered through the modern novel, especially those that examined the mind of the child. By examining the connection between authors and trends in child psychology, author Holly Blackford explains why many modern novels began to focus on child cognition as a site for intellectual and artistic exploration. In each chapter of this

book, select novels of the late-nineteenth or twentieth century are paired with a specific moment or movement from the history of developmental psychology. Novels such as Mark Twain's *Huckleberry Finn* and Henry James's *What Maisie Knew*, or Radclyffe Hall's less-canonical *The Well of Loneliness* and even Mark Haddon's *The Curious Incident of the Dog in the Night-Time*, showcase major questions about human epistemology through their child characters. From Lewis Carroll's *Alice* and her looking-glass to Richard Wright's *Bigger* Thomas and the murder of Mary Dalton to the chaotic *Neverland*--symbolizing the unmappable child's brain--a literary tradition of child consciousness has emerged as an experimental site for the unstable concepts of evolution, civilization, and development. By situating literature about children within concurrent psychological discourses, Blackford demonstrates how the modern novel contributed to the world's understanding of the boundless wonders and discernible limits of child consciousness.

HOLLY BLACKFORD is a professor of English at Rutgers University, Camden. She is the author of *Out of this World: Why Literature Matters to Girls*; *Mockingbird Passing: Closeted Traditions and Sexual Curiosities in Harper Lee's Novel*; *The Myth of Persephone in Girls' Fantasy Literature*; and editor of *100 Years of Anne with an 'e': The Centennial Study of Anne of Green Gables and Something Complete and Great: The Centennial Study of My Ántonia*.

Tayo's quest leads him back to the Indian past and its traditions, to beliefs about witchcraft and evil, and to the ancient stories of his people. The search itself becomes

a ritual, a curative ceremony that defeats the most virulent of afflictions—despair.

Not Quite a Genius Heinemann

"Lily?" My stomach dropped as a tall, dark-haired man stepped into view. Had he been hiding between the trees? "No. Sorry." Gulping, I took a step back. "I'm not Lily." He shook his head, a satisfied grin on his face. "No. You are Lily." "I'm Summer. You have the wrong person." You utter freak! I could hear my pulse crashing in my ears. How stupid to give him my real name. He continued to stare at me, smiling. It made me feel sick. "You are Lily," he repeated. Before I could blink, he threw his arms forward and grabbed me. I tried to shout, but he clasped his hand over my mouth, muffling my screams. My heart raced. I'm going to die. For months Summer is trapped in a cellar with the man who took her—and three other girls: Rose, Poppy, and Violet. His perfect, pure flowers. His family. But flowers can't survive long cut off from the sun, and time is running out...
