The textbook provides an introduction to the basics of communication using Central Thai vocabulary and idioms. Professor Wiworn Kesavatana-Dohrs has developed and perfected the methods and materials used in this volume over her many years of Thai language instruction at the University of Washington. The course book has proved effective in teaching university students, and it can be used more widely in a variety of teaching and learning contexts. Organized into a total of seven units and thirty thematic lessons, the book is designed to be used for a one-year study of Thai, taking a total of thirty weeks and 150 hours to complete. How adult learners can draw upon skills and knowledge honed over a lifetime to master a foreign language. Adults who want to learn a foreign language are often discouraged because they believe they cannot acquire a language as easily as children. Once they begin to learn a language, adults may be further discouraged when they find the methods used to teach children don't seem to work for them. What is an adult language learner to do? In this book, Richard Roberts and Roger Kreuz draw on insights from psychology and cognitive science to show that adults can master a foreign language if they bring to bear the skills and knowledge they have honed over a lifetime. Adults shouldn't try to learn as children do; they should learn like adults. Roberts and Kreuz report evidence that adults can learn new languages even more easily than children. Children appear to have only two advantages over adults in learning a language: they acquire a native accent more easily, and they do not suffer from self-defeating anxiety about learning a language. Adults, on the other hand, have the greater advantages—gained from experience—of an understanding of their own mental processes and knowing how to use language to do things. Adults have an especially advantageous grasp of pragmatics, the social use of language, and Roberts and Kreuz show how to leverage this metalinguistic ability in learning a new language. Learning a language takes effort. But if adult learners apply the tools acquired over a lifetime, it can be enjoyable and rewarding.

“A brilliant and thoroughly modern guide to learning new languages.”—Gary Marcus, cognitive psychologist and author of the New York

Times bestseller *Guitar Zero* At thirty years old, Gabriel Wyner speaks six languages fluently. He didn't learn them in school—who does?

Rather, he learned them in the past few years, working on his own and practicing on the subway, using simple techniques and free online resources—and here he wants to show others what he's discovered. Starting with pronunciation, you'll learn how to rewire your ears and turn

foreign sounds into familiar sounds. You'll retrain your tongue to produce those sounds accurately, using tricks from opera singers and actors. Next, you'll begin to tackle words, and connect sounds and spellings to imagery rather than translations, which will enable you to think in a foreign language. And with the help of sophisticated spaced-repetition techniques, you'll be able to memorize hundreds of words a month in minutes every day. This is brain hacking at its most exciting, taking what we know about neuroscience and linguistics and using it to create the most efficient and enjoyable way to learn a foreign language in the spare minutes of your day.

Timothy Cheek's revised edition of *Singing in Czech: A Guide to Czech Lyric Diction and Vocal Repertoire*, with its accompanying audio accessible online, builds on the original pioneering work of 2001 that set "a new and very welcome high standard for teaching lyric diction," according to *Notes: The Journal of the Music Library Association*. It offers users updated information, important clarifications, and expanded repertoire in a more accessible, easier to use format. *Singing in Czech* is divided into two parts. Using IPA, the first part takes the reader systematically through each sound of the Czech language, enhanced by recordings of native Czech opera singers. Chapters cover the Czech vowels, consonants, rules of assimilation, approaches to singing double consonants, stress and length, Moravian dialect, and an introduction to singing in Slovak. Fine points of formal pronunciation have been clarified in this revised edition. In the second part, Cheek offers a thorough overview of Czech art song, expanded from the first edition. Texts to major song literature and opera excerpts by Smetana, Dvořák, Janáček, Martinů, and Haas, with timings, editions, word-for-word translations, idiomatic translations, and IPA transcriptions follow. In this revision, Cheek has included additional cycles by Dvořák and Martinů, and two new chapters on Czech female composers Vítězslava Kaprálová and Sylvie Bodorová. This revised edition of *Singing in Czech* is useful for all those who are interested and engaged in the performance of the rich Czech vocal repertoire.
