Cracking the AP Psychology Exam, 2014 Edition Ty Crowell Company

There are a number of marvelous books that address the topic of the case method. If you are interested in facilitating cases, you can look to the classic book *Teaching and the Case Method* by Louis Barnes, C. Roland Christensen and Abby Hansen (1994). The collection of essays on the subject, *Education for Judgment: The Artistry of Discussion Leadership* by C. Roland Christensen, David Garvin and Ann Sweet (1991) is a wonderful and inspiring read as well. If your interest is case-based research, it would be nearly impossible to find a more authoritative source than Robert Yin's (2009, 4th Edition) *Case Study Research: Design and Methods*, which (at last count) has been cited nearly 29,000 times, according to Google Scholar. There is even a new entry to the field, William Ellet's (2007) *The Case Study Handbook: How to Read, Discuss, and Write Persuasively about Cases* that is specifically aimed at the student. At first glance, then, the topic of case studies in education and research seems to be pretty well covered. Do we really need another book on the subject? I write this book believing the

answer is yes. While I have great affection for the classics, there are a number of issues facing most business faculty—not to mention faculty members from disciplines outside of business—that these books simply do not address. In writing this book, my intention is to offer some thoughts on some of these. Paradoxically, these omissions arise from the very fact that the authors of the classics are undisputed masters of their craft. Why this is a problem should become clear as I identify the three areas of focus for this book. The first issue that I feel must be considered is using the case method with a novice audience. Consider the following. When I was enrolled in the MBA program at Harvard Business School (HBS) in the early 1980s, the curriculum consisted of nearly 900 case discussion (15 per week) and—perhaps—as many as 20 class periods given over to lecture-style presentations. When I teach a case-method graduate course at my own institution, on the other hand, I am constrained to 11 case discussions (a 12 week semester). As it happens, I am also the only course in the entire program that employs pedagogy reasonably faithful to the case method, as it is normally defined. The math is very simple. By the last day of my semester, my students have as much experience discussing cases as I did on Thursday afternoon of the first week of my two year MBA program at HBS. With the exception of faculty teaching at those rare institutions that have chosen to widely adopt the case method, the situation I face is commonplace. The second concern that existing books raise for

me is their tendency to focus on isolated topics. Specifically, case facilitation, case writing and case research are treated as separable activities. I would argue that these three aspects of the case method—which I define quite broadly—are inseparable. For institutions that wish to achieve the full set of benefits provided by the case method, all three activities must be pursued in parallel. Perhaps this is why so few institutions have achieved success through the case method. In this book, I will argue that achieving such integration is precisely why those rare institutions have been so successful. Once you start believing that the case method can be a key to institutional success, how you get there becomes a real challenge. At leading institutions featuring the case method, such as HBS, the philosophy is largely learned through a period of apprenticeship. For example, I did not encounter any of the references mentioned in the first paragraph—excepting Yin—at any time during my 5 year doctorate at HBS. Instead, I went out and wrote cases, facilitated discussions and did research under the guidance of faculty members who were masters of the craft. How can someone without the benefit of such an experience acquire such mastery? While I cannot offer any promises in this regard, I will at least provide some examples and easy-to-follow checklists that may be of service to individuals getting started.

Narrated in the first person, this short story is one episode in the life of a Russian labour-camp inmate. Written by Varlam Shalamov after his own experiences at a gulag, it describes the apathy of prisoners as they steadily approach death, the assuredness of betrayal and duplicity, and the constant craving for material satisfaction to lessen the empty, scorched feeling inside. When an old

acquaintance lays out an escape plan, that satisfaction is offered in the form of condensed milk: a sweet, delicious extravagance - a small element of joy in the midst of impending death.

When I was sixteen I became an Islamic fundamentalist. Five years later, after much emotional turmoil, I rejected fundamentalist teachings and returned to normal life and my family. I tried to put my experiences behind me, but as the events of 7/7 unfolded it became clear to me that Islamist groups pose a threat to this country that we - Muslims and non-Muslims alike - do not yet understand. Why are young British Muslims becoming extremists? What are the risks of another home-grown terrorist attack on British soil? By describing my experiences inside these groups, the reasons I joined them and how, after leaving I recovered my faith and mind, I hope to explain the appeal of extremist thought, how fanatics penetrate Muslim communities and the truth behind their agenda of subverting the West and moderate Islam. Writing candidly about life after extremism, I illustrate the depth of the problem that now grips Muslim hearts and minds. I will lay bare what politicians and Muslim 'community leaders' do not want you to know. This is the first time an ex-member openly discusses life within radical Islamic organisations. This is my story.
