"This edition of Government in America explains the reasons we have such a difficult time resolving differences over public policy and the stakes we all have in finding solutions to the challenges facing our nation. We frame its content with a public policy approach to government in the United States and continually ask-and answer-the question, "What difference does politics make to the policies that governments produce?" It is one thing to describe the Madisonian system of checks and balances and separation of powers or the elaborate and unusual federal system of government in the United States; it is something else to ask how these features of our constitutional structure affect the policies that governments generate. The essence of our approach to American government and politics is that politics matters. The national government provides important services, ranging from retirement security and health care to recreation facilities and weather forecasts. The government may also send us to war or negotiate peace with our adversaries, expand or restrict our freedom, raise or lower our taxes, and increase or decrease aid for education. In the twenty-first century, decision makers of both political parties are facing difficult questions regarding American democracy and the scope of our government"--

Never in American political history has there been so momentous a reversal of fortunes as that of Richard Nixon. How did it happen? What is this man's legacy to us all? These are among the questions explored by the staff of the Washington Post in the most penetrating examination of Nixon the man and the Nixon years ever put together. It is a story that begins with a small boy in a California town dreaming of distant places and golden opportunities. It is a story that climaxes with a man who achieved his dreams, yet more than anyone else was the instrument of their destruction. Richard Nixon, the people around him, and the controversies that have swirled throughout his entire career are brilliantly illuminated here. This is unforgettable human drama, and essential reading for all Americans.

Long recognized as a Chicago landmark, the Carson Pirie Scott Building also represents a milestone in the development of architecture. The last large commercial structure designed by Louis Sullivan, the Carson building reflected the culmination of the famed architect's career as a creator of tall steel buildings. In this study, Joseph Siry traces the origins of the building's design and analyzes its role in commercial, urban, and architectural history.

"WE NEED TO TALK." In this urgent and insightful book, public radio journalist Celeste Headlee shows us how to bridge what divides us--by having real conversations BASED ON THE TED TALK WITH OVER 10 MILLION VIEWS NPR's Best Books of 2017 Winner of the 2017 Silver Nautilus Award in Relationships & Communication "We Need to Talk is an important read for a conversationally-challenged, disconnected age. Headlee is a talented, honest storyteller, and her advice has helped me become a better spouse, friend, and mother." (Jessica Lahey, author of New York Times bestseller The Gift of Failure) Today most of us communicate from behind electronic screens, and studies show that Americans feel less connected and more divided than ever before. The blame for some of this disconnect can be attributed to our political landscape, but the erosion of our conversational skills as a society lies with us as individuals. And the only way forward, says Headlee, is to start talking to each other. In We Need to Talk, she outlines the strategies that have made her a better conversationalist--and offers simple tools that can improve anyone's communication. For example: BE THERE OR GO ELSEWHERE. Human beings are incapable of multitasking, and this is especially true of tasks that involve language. Think you can type up a few emails while on a business call, or hold a conversation with your child while texting your spouse? Think again. CHECK YOUR BIAS. The belief that your intelligence protects you from erroneous assumptions can end up making you more vulnerable to them. We all have blind spots that affect the way we view others. Check your bias before you judge someone else. HIDE YOUR

PHONE. Don't just put down your phone, put it away. New research suggests that the mere presence of a cell phone can negatively impact the quality of a conversation. Whether you're struggling to communicate with your kid's teacher at school, an employee at work, or the people you love the most--Headlee offers smart strategies that can help us all have conversations that matter.

The Influence of Sea Power Upon History Franklin Watts

When I was sixteen I became an Islamic fundamentalist. Five years later, after much emotional turmoil, I rejected fundamentalist teachings and returned to normal life and my family. I tried to put my experiences behind me, but as the events of 7/7 unfolded it became clear to me that Islamist groups pose a threat to this country that we - Muslims and non-Muslims alike - do not yet understand. Why are young British Muslims becoming extremists? What are the risks of another home-grown terrorist attack on British soil? By describing my experiences inside these groups, the reasons I joined them and how, after leaving I recovered my faith and mind, I hope to explain the appeal of extremist thought, how fanatics penetrate Muslim communities and the truth behind their agenda of subverting the West and moderate Islam. Writing candidly about life after extremism, I illustrate the depth of the problem that now grips Muslim hearts and minds. I will lay bare what politicians and Muslim 'community leaders' do not want you to know. This is the first time an ex-member openly discusses life within radical Islamic organisations. This is my story.

Classic Books Library presents this brand new edition of "The Federalist Papers", a collection of separate essays and articles compiled in 1788 by Alexander Hamilton. Following the United States Declaration of Independence in 1776, the governing doctrines and policies of the States lacked cohesion. "The Federalist", as it was previously known, was constructed by American statesman Alexander Hamilton, and was intended to catalyse the ratification of the United States Constitution. Hamilton recruited fellow statesmen James Madison Jr., and John Jay to write papers for the compendium, and the three are known as some of the Founding Fathers of the United States. Alexander Hamilton (c. 1755-1804) was an American lawyer, journalist and highly influential government official. He also served as a Senior Officer in the Army between 1799-1800 and founded the Federalist Party, the system that governed the nation's finances. His contributions to the Constitution and leadership made a significant and lasting impact on the early development of the nation of the United States.

Johannes Kepler is a fascinating man who would revolutionize humanity's conception of the cosmos and their place within it. He would replace the Ptolemaic system with his three laws that described the orbital motion of the planets around the Sun. This scientist's work continues to inform and facilitate modern advances in technology, astronomy, and astrophysics. In addition to being an enthralling life and times account of a great thinker, this biography also supports Common Core standards for the reading of biographies, historical and scientific accounts, the analyzing of the relationship between primary and secondary sources, and citing evidence to support that analysis.

The Influence of Sea Power Upon History (1890) is a work of naval history and strategy by Alfred Thayer Mahan. Drawing on decades of experience as a naval officer, researcher, and university lecturer, Mahan develops his theory of sea power in the seventeenth and eighteenth centuries in this popular and important text. Despite a lack of primary sources, The Influence of Sea Power would prove essential to the expansion of European and American imperialism through the use of naval might and has been cited as one of the most influential works of the nineteenth century. "The history of Sea Power is largely, though by no means solely, a narrative of contests between nations, of mutual rivalries, of violence frequently culminating in war." For Alfred Thayer Mahan, there was no greater indicator of national might throughout history than control of the planet's oceans. In this detailed study of the subject, drawn from years of research and lectures given at the Naval War College in Rhode Island, Mahan traces the influence of sea power on such conflicts as the English Revolution and the Seven Years' War to argue that supremacy of the seas coincides with global commercial and political dominance throughout history. Immediately successful, The Influence of Sea Power Upon History would justify the expansion of imperialism as well as shape the naval arms race between Great Britain and Germany in the years preceding the First World War. With a beautifully designed cover and professionally typeset manuscript, this edition of Alfred Thayer Mahan's The Influence of Sea Power Upon History is a classic of naval strategic scholarship reimagined for modern readers.

The powerful true story of life in a Japanese American internment camp. During World War II the community called Manzanar was hastily created in the high mountain desert country of California, east of the Sierras. Its purpose was to house thousands of Japanese American internees. One of the first families to arrive was the Wakatsukis, who were ordered to leave their fishing business in Long Beach and take with them only the belongings they could carry. For Jeanne Wakatsuki, a seven-year-old child, Manzanar became a way of life in which she struggled and adapted, observed and grew. For her father it was essentially the end of his life. In Farewell to Manzanar, Jeanne Wakatsuki Houston recalls life at Manzanar through the eyes of the child she was. She tells of her fear, confusion, and bewilderment as well as the dignity and great resourcefulness of people in oppressive and demeaning circumstances. Jeanne delivers a

powerful first-person account that reveals her search for the meaning of Manzanar. Farewell to Manzanar has become a staple of curriculum in schools and on campuses across the country. Named one of the twentieth century's 100 best nonfiction books from west of the Rockies by the San Francisco Chronicle.
