Unfolding case-based vignettes written by the National League for Nursing bring concepts to life through realistic clinical scenarios. Concise, streamlined approach emphasizes need-to-know information for efficient learning. Nursing Processes clarify the process for planning patient-centered care. Critical Thinking Scenarios guide you through the collection and application of data for commonly encountered clinical interactions. Nursing Considerations sections detail the rationale behind each nursing intervention to enhance your

clinical decision-making capabilities. Drug Lists at the beginning of each chapter enable fast identification of prototype drugs for each class. Drugs in Focus tables provide at-a-glance reference for generic and trade names, usual dosage and indications for each drug within a class. Focus on Safe Medication Administration boxes help you ensure patient safety and increase the therapeutic effectiveness of drugs. Focus on the Evidence boxes identify the best nursing practices associated with specific drugs based on available evidence. Focus on Herbal and Alternative Therapies alert you to known interactions with specific herbs or alternative therapies that could

affect drug actions. Focus on Calculations refine your calculation and measurement skills. Focus on Drug Therapy Across the Lifespan boxes provide quick access to drug class considerations for use with children, adults and the elderly. Focus on Gender Considerations and Focus on Cultural Considerations help you ensure effective, culturally sensitive drug therapy across diverse populations. Check Your Understanding sections equip you for your exams with NCLEX®-style review questions, including alternate-format questions. Effectively learning

pharmacology requires students to clearly see the connection between pharmacology, disease and patient care. Pharmacology for Nurses, 3e i(this is the standalone book) is structured to present pharmacology and pathology together, so students can more easily grasp the interrelationship between these subjects and provide a holistic perspective to patient care. A prototype approach, easy to follow presentation and extensive pedagogical aids enable students to

understand key concepts and apply essential components of nursing care to drug therapy. If you want the book and access code you need to order: 0131392468 / 9780131392465

Memorize the pharmacology facts you need to know — in a flash! Featuring more than 100 colorful 4 x 6 note cards, Mosby ' s Pharmacology Memory NoteCards: Visual, Mnemonic, & Memory Aids for Nurses, 6th Edition uses illustrations and humor to make studying easier and more fun. This unique pharmacology review may be used as either a spiral-bound notebook or as individual flashcards, so it ' s perfect for studying while on the go. Created by nursing educators JoAnn Zerwekh and Ashley Garneau, these durable note cards will help you prepare

for class, clinicals, or the NCLEX® examination. There ' s no other study tool like it! UNIQUE! Color-highlighted monographs emphasize important nursing implications, frequent side effects, serious or life-threatening implications, and patient teaching, making it easier to identify nursing priorities on common medications. UNIQUE! Mnemonics and other proven memory aids help you grasp and remember even the most complex concepts. UNIQUE! More than 100 colorful cartoons offer humorous and

memorable presentations of key drugs, and are ideal for visual learners. What You Need to Know sections on each card cover the most essential information in a quick and easy-to-review format. Thick pages and a spiral-bound format create a portable tool that is durable enough for use in the clinical environment. Colored thumb tabs at the bottom of the page allow you to find topics quickly. NEW! 8 brand-new cards are added on these topics: Pre-Exposure Prophylaxis (PrEP), Azoles, Mupirocin, Cyanocobalamin, Gabapentin, Corticosteroids, Clobetasol, and

Folic Acid. NEW! Updated content is thoroughly reviewed and included throughout the cards.

Focus on Nursing Pharmacology Amy Karch has found that students learn best when concepts are built upon each other, growing from simple to complex, building on a foundation of understanding. Organized by body systems, this heavily illustrated book organizes essential nursing pharmacology information into focused, easy-to-learn steps. Building key concepts upon each other, the text gives students a solid foundation of understanding. Easy to understand drug prototype boxes are integrated as well as

integrated content summaries. The fifth edition includes a completely revamped art program with more images depicting drug actions than any of the book's competitors. The fifth edition also underwent major reorganization to streamline the very functional "Focus on" theme for drug use across the lifespan, cultural and gender considerations, evidence-based practice, patient teaching, herbal and alternative therapies and dosage calculations; a new box, "Focus on Safe Medication Administration;" and totally revamped "Drugs in Focus" table for each classification of drugs. Focused content and focused features equal a focused student. In addition, we've expanded and

updated content on psychiatric agents (includes new indications, cautions and precautions), and significantly expanded information on AIDS and therapeutic management. Drug discussions include therapeutic actions and indications, pharmacokinetics, contraindications and cautions and adverse effects. Detailed rationales are presented throughout. Each chapter opens with Learning Objectives and a Glossary of Key Terms, and ends with NCLEX-style questions, and contains a case study-based critical thinking exercise that sets up a situation, shows critical thinking, and then presents a discussion and case-based nursing care guide.

Features like this make the book an essential teaching tool. Lippincott's Photo Atlas of Medication Administration comes with this text. Photo Atlas uses the nursing process format to provide step-by-step nursing skills (with rationales). In addition to being completely illustrated, the Photo Atlas also contains documentation guidelines and samples, and Unexpected Situations, which explain how to respond to unanticipated outcomes. Topics include removing medication from an ampule, removing medication from a vial, mixing medications from two vials in one syringe, administering an intradermal injection, and more.
