North American Edition

Amy Karch has found that

students learn best when concepts are built upon each other, growing from simple to complex, building on a foundation of understanding. Organized by body systems, this heavily illustrated book organizes essential nursing pharmacology information into focused, easy-to-learn steps. Building key concepts upon each other, the text gives students a solid foundation of understanding. Easy to understand drug prototype boxes are integrated throughout the book as well as integrated content summaries. It includes the popular and proven "Focus on" theme for drug use across the lifespan, cultural and gender considerations, evidence-based practice, patient teaching, herbal and alternative therapies and dosage calculation, with "Focus on Safe Medication Administration" and a "Drugs in Focus" table for each classification of drugs. Drug discussions include therapeutic actions and indications, pharmacokinetics, contraindications and cautions and adverse effects. Detailed

rationales are presented throughout. Each chapter opens with Learning Objectives and a Glossary of Key Terms, and ends with NCLEX-style questions, and contains a case study-based critical thinking exercise with a discussion and case-based nursing care guide. Included in this package is Lippincott's Photo Atlas of Medication Administration (ISBN 9781451112481) which uses the nursing process format to provide step-by-step nursing skills.

Current, concise, and optimized for today's

nursing practice, Focus on Nursing Pharmacology makes challenging concepts more approachable to establish a foundation for effective drug therapy throughout your nursing career. This updated 8th edition builds on your knowledge of physiology, chemistry and nursing fundamentals to help you conceptualize need-to-know information about each group of drugs, while engaging learning features cultivate your clinical application, critical thinking and patient education capabilities. New! Concept Mastery Alerts alert you to commonly misunderstood concepts. New! Unfolding case-based vignettes written by the National League for Nursing bring concepts to life through realistic clinical scenarios. Concise,

streamlined approach emphasizes need-to-know information for efficient learning. Nursing Processes clarify the process for planning patient-centered care. Critical Thinking Scenarios guide you through the collection and application of data for commonly encountered clinical interactions. Nursing Considerations sections detail the rationale behind each nursing intervention to enhance your clinical decision-making capabilities. Drug Lists at the beginning of each chapter enable fast identification of prototype drugs for each class. Drugs in Focus tables provide at-a-glance reference for generic and trade names, usual dosage and indications for each drug within a class. Focus on Safe Medication Administration boxes help

you ensure patient safety and increase the therapeutic effectiveness of drugs. Focus on the Evidence boxes identify the best nursing practices associated with specific drugs based on available evidence. Focus on Herbal and Alternative Therapies alert you to known interactions with specific herbs or alternative therapies that could affect drug actions. Focus on Calculations refine your calculation and measurement skills. Focus on Drug Therapy Across the Lifespan boxes provide quick access to drug class considerations for use with children, adults and the elderly. Focus on Gender Considerations and Focus on Cultural Considerations help you ensure effective, culturally sensitive drug therapy across diverse populations. Check

Your Understanding sections equip you for your exams with NCLEX®-style review questions, including alternate-format questions. Watch and Learn videos available on thePoint® help you avoid medication errors in practice.
