Samuel Wells vividly paints the stories surrounding Jesus' cross and resurrection. We see the weakness of Pontius Pilate and Barabbas, and the compromised character of Joseph of Arimathea and Nicodemus. We discover the subtle power of Pilate's wife. And in Peter and Mary Magdalene we find the true power of resurrection, bringing forgiveness and ending the stranglehold of death, thus transforming all human passion. Through close readings of the gospel texts, Wells demonstrates the significance of these characters for faith and life today. In this book, structured with one chapter for each week of Lent, Wells guides us from the deathly power that put Jesus on the cross to the new power brought by Jesus' resurrection. The book offers opportunities at the end of each chapter for prayer and discussion. The Archbishop of Canterbury has selected *Power and Passion* as his Lent book for 2007.

Do you do what you love and love what you do? How many of us are stuck in day jobs that really don't suit us? Has our heart left the building? It is so easy to go through the motions in leadership and management and lead with our heads, while our hearts long to be elsewhere. In this short new passion-packed book by Dr. Hans Finzel, you will learn what it means to work in your "passion zone." Hans explains from his own journey, how to find your passion zone and what action steps to take if you are far from that place of fulfillment. Specifically you will learn about how to match up your profile and wiring to just the right assignment. People love following leaders whose hearts are fueled by passion. This book will help you uncover what passion in your work really is, and how to find it, no matter what stage you are at in your career. The advice in this book is especially powerful for anyone in a

role of leadership that is experiencing boredom or burn out. Life is too short to settle for less than the best—especially if we are called to lead other people. Leading from the heart is working and leading from your passion zone. Why does leading from the heart really matter? It can be natural to think, "If I am smart enough, gifted enough and work hard enough, of course people will respond to my leadership." The more gifted you are, and the smarter you are, the more that this can be a temptation and the easy default. The problem is, that kind of leadership does not inspire people and build deep loyalty. The opposite is often true. People follow people who they know, trust and believe. That trust is built between leader and follower within their hearts. People follow leaders who are operating in their "passion zone." There is some sort of a magnetic loyalty that grows in followers who respond to leaders who lead with passion out front. It seems that in today's fast paced always on digital world, less is more. So that is what the author is offering up this first in a series of mini books on big leadership topics.

Who hasn't asked the question "How can I find and follow my true calling?" Elle Luna frames this moment as "standing at the crossroads of Should and Must." "Should" is what we feel we ought to be doing, or what is expected of us. "Must" is the thing we dream of doing, our heart's desire. And it was her own personal journey that inspired Elle Luna to write a brief online manifesto that, in a few short months, has touched hundreds of thousands of people who've read it or heard Elle speak on the topic. Now Ms. Luna expands her ideas into an inspirational, highly visual gift book for every recent graduate, every artist, every seeker, every career changer. *The Crossroads of Should and Must* has a universal message—we get to choose the path between Should and Must. And it gives every reader permission to embrace this message. It's about the difference between jobs, careers, and callings. The difference between going to work and becoming one with your work. Why knowing what you want is often the hardest part. It gives eye-opening techniques for reconnecting with one's inner voice, like writing your own obituary (talk about putting life in perspective). It talks about the most common fears of choosing Must over Should—money, time, space, and the ultimate fear: total vulnerability—and shores up our hesitation with inspiring stories of and quotes from the artists and writers and thinkers who've faced their own crossroads of Should and Must and taken the leap. It explains the importance of mistakes, of "unlearning," of solitude, of keeping moving, of following a soul path. Presented in four chapters—*The Crossroads*, *The Origin of Should, Must, and The Return*—inspired by the hero's journey outlined by Joseph Campbell, *The Crossroads of Should and Must* guides us from the small moment, discovering our Must, to the big moment—actually doing something about it, and returning to share our new gifts with the world.

A remarkable guide to the quests that give our lives meaning—and how to find your own—from the New York Times bestselling author of *The \$100 Startup* and *100 Side Hustles* "If you like complacency and mediocrity, do not read this book. It's dangerously inspiring." —A. J. Jacobs, author of *The Know-It-All* When he set out to visit all of the planet's countries by age thirty-five, compulsive goal-seeker Chris Guillebeau never imagined that his journey's biggest revelation would be how many people like himself exist—each pursuing a challenging quest. These quests are as diverse as humanity itself, involving exploration, the pursuit of athletic or artistic excellence, or battling against injustice and poverty. Everywhere that Chris visited he found ordinary people working toward extraordinary goals, making daily down payments on their dreams. These "questers" included a suburban mom pursuing a wildly ambitious culinary project, a DJ producing the world's largest symphony, a young widower completing the tasks his wife would never accomplish—and scores of others writing themselves into the record books. The more Chris spoke with these strivers, the more he began to appreciate the direct link between questing and long-term happiness, and he was compelled to complete a comprehensive study of the phenomenon. In *The Happiness of Pursuit*, he draws on interviews with hundreds of questers, revealing their secret motivations, their selection criteria, the role played by friends and family, their tricks for solving logistics, and the importance of documentation. Equally fascinating is Chris's examination of questing's other side. What happens after the summit is climbed, the painting hung, the endurance record broken, the at-risk community saved? A book that challenges each of us to take control—to make our lives be about something while at the same time remaining clear-eyed about the commitment—*The Happiness of Pursuit* will inspire readers of every age and aspiration. It's a playbook for making your life count. "The Happiness of Pursuit is smart, honest, and dangerous. Why dangerous? Because it is as practical as it is inspiring. You won't just be daydreaming about your quest—you'll be packing for it!" —Brené Brown, Ph.D., LMSW, author of *Daring Greatly*

The coauthors of the bestselling *Peak Performance* dive into the fascinating science behind passion, showing how it can lead to a rich and meaningful life while also illuminating the ways in which it is a double-edged sword. Here's how to cultivate a passion that will take you to great heights—while minimizing the risk of an equally great fall. Common advice is to find and follow your passion. A life of passion is a good life, or so we are told. But it's not that simple.

Rarely is passion something that you just stumble upon, and the same drive that fuels breakthroughs—whether they're athletic, scientific, entrepreneurial, or artistic—can be every bit as destructive as it is productive. Yes, passion can be a wonderful gift, but only if you know how to channel it. If you're not careful, passion can become an awful curse, leading to endless seeking, suffering, and burnout. Brad Stulberg and Steve Magness once again team up, this time to demystify passion, showing readers how they can find and cultivate their passion, sustainably harness its power, and avoid its dangers. They ultimately argue that passion and balance—that other virtue touted by our culture—are incompatible, and that to find your passion, you must lose balance. And that's not always a bad thing. They show readers how to develop the right kind of passion, the kind that lets you achieve great things without ruining your life. Swift, compact, and powerful, this thought-provoking book combines captivating stories of extraordinarily passionate individuals with the latest science on the biological and psychological factors that give rise to—and every bit as important, sustain—passion.

In an unorthodox approach, Georgetown University professor Cal Newport debunks the long-held belief that "follow your passion" is good advice, and sets out on a quest to discover the reality of how people end up loving their careers. Not only are pre-existing passions rare and have little to do with how most people end up loving their work, but a focus on passion over skill can be dangerous, leading to anxiety and chronic job hopping. Spending time with organic farmers, venture capitalists, screenwriters, freelance computer programmers, and others who admitted to deriving great satisfaction from their work, Newport uncovers the strategies they used and the pitfalls they avoided in developing their compelling careers. Cal reveals that matching your job to a pre-existing passion does not matter. Passion comes after you put in the hard work to become excellent at something valuable, not before. In other words, what you do for a living is much less important than how you do it. With a title taken from the comedian Steve Martin, who once said his advice for aspiring entertainers was to "be so good they can't ignore you," Cal Newport's clearly written manifesto is mandatory reading for anyone fretting about what to do with their life, or frustrated by their current job situation and eager to find a fresh new way to take control of their livelihood. He provides an evidence-based blueprint for creating work you love, and will change the way you think about careers, happiness, and the crafting of a remarkable life.

Probing the ominous side of career advice to "follow your passion," this data-driven study explains how the passion principle fails us and perpetuates inequality by class, gender, and race; and it suggests how we can reconfigure our relationships to paid work. "Follow your passion" is a popular mantra for career decision-making in the United States. Passion-seeking seems like a promising path for avoiding the potential drudgery of a life of paid work, but this "passion principle"—seductive as it is—does not universally translate. *The Trouble with Passion* reveals the significant downside of the passion principle: the concept helps culturally legitimize and reproduce an exploited, overworked white-collar labor force and broadly serves to reinforce class, race, and gender segregation and inequality. Grounding her investigation in the paradoxical tensions between capitalism's demand for ideal workers and our cultural expectations for self-expression, sociologist Erin A. Cech draws on interviews that follow students from college into the workforce, surveys of US workers, and experimental data to explain why the passion principle is such an attractive, if deceptive, career decision-making mantra, particularly for the college educated. Passion-seeking presumes middle-class safety nets and springboards and penalizes first-generation and working-class young adults who seek passion without them. The ripple effects of this mantra undermine the promise of college as a tool for social and economic mobility. The passion principle also feeds into a culture of overwork, encouraging white-collar workers to tolerate precarious employment and gladly sacrifice time, money, and leisure for work they are passionate about. And potential employers covet, but won't compensate, passion among job applicants. This book asks, What does it take to center passion in career decisions? Who gets ahead and who gets left behind by passion-

seeking? *The Trouble with Passion* calls for citizens, educators, college administrators, and industry leaders to reconsider how we think about good jobs and, by extension, good lives.
