Food safety is an essential part of any food service or retail operation. Understanding the risks and ways to prevent foodborne illness will protect customers and businesses from harm. The person-in-charge of a food service or retail establishment must know how and what food safety practices to monitor. This manual is written to provide the person-in-charge of a food service or retail establishment the knowledge and skills that they will need to keep food safe. Learning and applying food safety practices protects customers and businesses. This course is designed for every food service or retail operation. The manual is divided into three sections: Section 1 - Foundations of Food Safety: The person-in-charge will study an overview of the regulations, food safety basics, microorganisms, and core food safety features. This section will build the foundation that a person-in-charge will need in order to apply food safety practices. Section 2 - Addressing the Five CDC Risk Factors: The Centers for Disease Control and Prevention (CDC) has identified the five most common causes of foodborne illness. The person-in-charge will learn how to address these issues and control these risk factors in order to be able to serve and sell safe food in their operation. Section 3 - Proactive Food Safety System: Once a food safety foundation is built and the risk factors have been addressed, a food safety management system can be applied. Hazard Analysis and Critical Control Point (HACCP) is a proactive system that assesses the food safety hazards in an operation and identifies ways to prevent, eliminate, or reduce each hazard to a safe level. The person-in-charge will learn to apply the seven HACCP

---

principles in their operation.

Upon completion of the SURE Food Safety Manager Manual, participants will have the knowledge to safely serve and sell food to their customers.

Participants will also be prepared to take an ANSI-accredited Food Protection Manager Examination.

FAO's work is building the capacity of food control personnel, including government authorities and food industry personnel carrying out food quality and safety assurance programmes. Such programmes should include specific food risk control procedures such as the Hazard Analysis and Critical Control Point (HACCP) system. FAO has prepared this manual in an effort to harmonize the approach to training in the HACCP system based on the already harmonized texts and guidelines of the Codex Alimentarius Commission. The manual is structured to provide essential information in a standardized, logical and systematic manner while adhering to effective teaching and learning strategies. **Food Safety in Child Care Settings** Certified Food Safety Manager Exam (Cpfm) Study Guide

The safety of food products is fundamental. The value of an effective and well-defined, -implemented, and -maintained

management system is priceless.

When it is integrated into a process, it supplies the necessary foundation and structure to help provide the consumer with a safe product of the highest quality.

Food Safety Management Programs: Applications, Best Practices, and Compliance presents the insight and shared experiences that can be applied to the development, implementation, and maintenance of an effective food safety management system. The text supplies useful tools that can be applied according to the particular needs of an operation, adding value to its processes and aiding in the establishment of a successful management-based food safety system. The author also encourages the development of a quality management system. The text begins by summarizing Global Food Safety Initiative (GFSI) food safety schemes (eight as of the writing of this text). These include FSSC 22000, Safe Quality Food Code (SQF), British Retail Consortium Global Standard for Food Safety (BRC), International Featured Standards (IFS), Global Aquaculture

---

Alliance (GAA) Seafood Processing Standard, Global Red Meat Standard (GRMS), CanadaGAP, and PrimusGFS. It also lists websites for additional information and updates.

Although this text focuses on food safety management systems (FSMS), it also includes references to ISO 9001, along with the quality requirements of some of the food safety management standards. It offers information that can be applied to whichever standard is chosen by an organization. With insights from experts in a variety of food industry-related sectors, the text explains the requirements of the standards, methods for their integration, and the process for identifying and addressing gaps in a manner that is both compliant and beneficial for the organization. The book provides experience-based information that can be integrated into any operation, which is essential for the development of an efficient, value-added, and sustainable management system.

Currently, there is no one  
book or textbook that covers  
all aspects of retail food  
safety. It is becoming apparent  
that a number of issues  
relating to retail food safety  
have come to the forefront in  
some jurisdictions of late. For  
example, a recent USDA risk  
assessment has pointed out  
that issues occurring at USA  
retail appear to be critical in  
terms of contamination of deli-  
meat. As well, a large  
listeriosis outbreak in Quebec  
pointed to retail cross-  
contamination as a key issue.  
In terms of sanitation, a  
number of advances have been  
made, but these have not all  
been synthesized together in  
one chapter, with a focus on  
retail. In addition, the whole

area of private standards and the Global Food Safety Initiative (GFSI) have come to the forefront of late and these as well will be explored in great detail. Other aspects related to the safety of important food commodities such as seafood, meat, produce and dairy will also be discussed and salient areas addressed.

*The Food Safety Information Handbook* Elsevier Health Sciences

The leadership solution for food service and retail establishments. This is the advanced book for food handlers and management. This manual builds on the foundational concepts taught in The HACCP Food Safety

Employee Manual. In this manual, managers will learn how to complete a HACCP system that includes prerequisite programs, food safety, food defense, standard operating procedures, and the 7 HACCP principles in order to prevent, eliminate, or reduce hazards to serve and/or sell safe food. Instruis has developed the HACCP Star as a training aid that is used to teach these core elements for HACCP. Implementing a Food Safety HACCP plan provides management with the confidence in knowing that they have set up a system for success, allows for monitoring operation practices and procedures to meet legal responsibilities, and creates a food safety culture. The SURE HACCP Food Safety Series provides a proactive approach to Food HACCP by controlling every step in the flow of food to prevent foodborne illness or injury. Also included is a SURE answer sheet that is used to take the HACCP Food Safety Manager examination
