The stages of Blastocystis have been known for 101 years. However, many facts are still disputed, e.g. even the question whether it is a true pathogen or a commensal present in sometimes life-threatening diarrheas. The present book evaluates in chapters contributed by renowned researchers the latest findings on:

- Landmarks in the discovery of Blastocystis
- Epidemiology, transmission and zoonotic potential
- Morphology of human and animal Blastocystis isolates
- Clinical aspects of Blastocystis infections
- Behavioral decision analysis: what makes us sick?
- Blastocystis-host interactions
- Molecular approaches on the systematical position
- Genetic polymorphism
- Blastocystis from a statistical point of view
- Diarrheas due to different agents of disease
- Zoonotic diseases in comparison

As such, this book provides a broad range of information for people working in this field, for physicians and veterinarians who are confronted with clinical cases, teachers, students and technical staff members in the fields of microbiology, parasitology and diagnostic methods.

Approximately 30 percent of the edible food produced in the United States is wasted and a significant portion of this waste occurs at the consumer level. Despite food's essential role as a source of nutrients and energy and its emotional and cultural importance, U.S. consumers waste an estimated average of 1 pound of food per person per day at home and in places where they buy and consume food away from home. Many factors contribute to this waste â€" consumers behaviors are shaped not only by individual and

interpersonal factors but also by influences within the food system, such as policies, food marketing and the media. Some food waste is unavoidable, and there is substantial variation in how food waste and its impacts are defined and measured. But there is no doubt that the consequences of food waste are severe: the wasting of food is costly to consumers, depletes natural resources, and degrades the environment. In addition, at a time when the COVID-19 pandemic has severely strained the U.S. economy and sharply increased food insecurity, it is predicted that food waste will worsen in the short term because of both supply chain disruptions and the closures of food businesses that affect the way people eat and the types of food they can afford. A National Strategy to Reduce Food Waste at the Consumer Level identifies strategies for changing consumer behavior, considering interactions and feedbacks within the food system. It explores the reasons food is wasted in the United States, including the characteristics of the complex systems through which food is produced, marketed, and sold, as well as the many other interconnected influences on consumers' conscious and unconscious choices about purchasing, preparing, consuming, storing, and discarding food. This report presents a strategy for addressing the challenge of reducing food waste at the consumer level from a holistic, systems perspective.

Innovation and Best Practices in Hospitality and Tourism Research contains 71 accepted papers from the Hospitality and Tourism Conference (HTC 2015, Melaka, Malaysia, 2-3 November, 2015). The book presents the up-and-coming paradigms and innovative practices within the hospitality and tourism industries, and covers the following topics: Mana

Food Safety and Sanitation Audiovisuals, January 1979 - December 1988

This book provides an overview of issues associated primarily with food safety, shelf-life assessment and preservation of foods. Food safety and protection is a multidisciplinary topic that focuses on the safety, quality, and security aspects of food. Food safety issues involve microbial risks in food products, foodborne infections, and intoxications and food allergenicity. Food protection deals with trends and risks associated with food packaging, advanced food packaging systems for enhancing product safety, the

development and application of predictive models for food microbiology, food fraud prevention, and food laws and regulations with the aim to provide safe foods for consumers. Food Safety and Protection covers various aspects of food safety, security, and protection. It discusses the challenges involved in the prevention and control of foodborne illnesses due to microbial spoilage, contamination, and toxins. It starts with documentation on the microbiological and chemical hazards, including allergens, and extends to the advancements in food preservation and food packaging. The book covers new and safe food intervention techniques, predictive food microbiology, and modeling approaches. It reviews the legal framework, regulatory agencies, and laws and regulations for food protection. The book has five sections dealing with the topics of predictive microbiology for safe foods; food allergens, contaminants, and toxins; preservation of foods; food packaging; and food safety laws.

Health care is a team effort, so why keep training for solo sprints? Introducing Foundations of Interprofessional Collaborative Practice in Health Care - a unique new textbook that will equip you to become an effective member of interprofessional healthcare teams. This completely new textbook is the first on the market to introduce the Interprofessional Education Collaborative (IPEC, 2011, 2016) Core Competencies for Interprofessional Collaborative Practice and to provide practice in applying these competencies to everyday practice. Expertly written by an interprofessional team for a wide variety of health professions students, this textbook provides a solid foundation in the four Core Competencies: Values and Ethics for Interprofessional Practice, Roles and Responsibilities, Interprofessional Communication, and Teams and Teamwork. It then elaborates each Core Competency by defining and describing each Sub-Competency. With a variety of interactive Case Studies, Caselets, and Exemplar Case Studies, it then illustrates the contributions and interconnectedness of each provider's role to demonstrate how Core Competencies would be applied and put into action for improved patient outcomes. UNIQUE! Three-part units each addressing one of the four IPEC

Core Competencies to help you to understand the core competencies and learn how to apply them in your own profession. UNIQUE! Detailed explorations of each Sub-Competency for all four IPEC Core Competencies thoroughly present the essential elements of each Core Competency for deep understanding of how to collaborate with other professions. UNIQUE! Case Studies, "Caselets," and Exemplar Case Studies illustrate each competency and provide opportunities for you to apply your understanding of the material. A variety of Active Learning activities driven by core content are integrated into each chapter. UNIQUE! Global Perspectives boxes and additional international resources highlight the important work being done internationally in interprofessional education and interprofessional collaborative practice. Research Highlights help you to understand the reasoning and knowledge behind the Core Competencies. Learning Outcomes and Key Points outline and review the main takeaways from each chapter.
