<p>New York Times critically acclaimed suspense writer, Chris Knopf, reaches a new imaginative peak in this outstanding revenge novel. Imagine this: You have a nice life. You love your beautiful, successful wife. You're an easygoing guy working out of your comfortable Connecticut home. The world is an interesting, pleasant place. Then in seconds it's all gone. You're still alive, but the world thinks you're dead. And now you have to decide. Make it official, or go after the evil that took it all away from you. The first edition of Cold and Chilled Storage Technology was prepared at a time when great changes were taking place in the industry that were hard to put into clear perspective. For example, the

CFClozone layer problem was identified, the Montreal Protocol was signed and experts from many disciplines were already proposing 'solutions' to the problems seen at the time. Not only were there the usual differences in approach to the problems, there were different understandings of the problems themselves. For instance, some authoritative voices were saying HCFC 22 was 'part of the solution, not part of the problem' and recommending it as the main refrigerant for the future, others said the opposite. As editor, I have taken the view that this should be a 'reference book' and, as such, it should contain

information that points in the direction of tried and proven good practice. To avoid the risk of misdirecting readers, I decided that the CFC issue was too unclear to be usefully discussed in the first edition and left it out altogether. This was the main criticism of the first edition at the time of its publication but, in view of the developments since then, I stand by my decision to avoid premature comment in that instance. The matter is discussed in this edition in Chapters 4 and 7, which include summaries of other related factors, in a way that was certainly not possible in 1989. Received document entitled: APPENDIX TO PETITION FOR WRIT Clearinghouse Review "Join former NBC newsman and Meet the Press moderator David Gregory as he probes various religious traditions to better understand his own faith and answer life's most important questions: who do we want to be and

what do we believe? While David was covering the White House, he had the unusual experience of being asked by President George W. Bush "How's your faith?" David's answer was just emerging. Raised by a Catholic mother and a Jewish dad, he had a strong sense of Jewish cultural and ethnic identity, but no real belief--until his marriage to a Protestant woman of strong faith inspired him to explore his spirituality for himself and his growing family. David's journey has taken him inside Christian mega-churches and into the heart of Orthodox Judaism.

He's gone deep into Bible study and asked tough questions of America's most thoughtful religious leaders, including evangelical preacher Joel Osteen and Cardinal Timothy Dolan, the Catholic Archbishop of New York. It has brought him back to his childhood, where belief in God might have helped him through his mother's struggle with alcoholism, and through a difficult period of public scrutiny and his departure from NBC News, which saw his faith tested like never before. David approaches his faith with the curiosity and dedication you would expect from a journalist accustomed to holding politicians and Presidents accountable. But he also comes as a seeker, one just discovering why spiritual journeys are always worthwhile"--
