One language is falling silent every two weeks. Half of the 7,000 languages spoken in the world today will be lost by the end of this

century. With the loss of these languages, we also lose the unique poetic traditions of their speakers and writers. Poems from the *Edge of Extinction* gathers together 50 poems in languages from around the world that have been identified as endangered; it is a celebration of our linguistic diversity and a reminder of our commonalities and the fundamental role verbal art plays in human life around the world. With poems by influential, award-winning poets such as US poet laureate Joy

Harjo, Hawad, Valzhyna Mort, and Jackie Kay, this anthology offers a unique insight into both languages and poetry, taking the reader on an emotional, life-affirming journey into the culture of these beautiful languages. Each poem appears in its original form, alongside an English translation, and is accompanied by a commentary about the language, the poet and the poem - in a vibrant celebration of life, diversity, language, and the enduring power of poetry. This timely collection is

passionately edited by widely published poet and UK National Poetry Librarian, Chris McCabe, who is also the founder of the Endangered Poetry Project, a major project launched by London's Southbank Centre to collect poetry in the world's disappearing languages, and introduced by Dr Mandana Seyfeddinipur, Director of the Endangered Languages Documentation Programme and the Endangered Languages Archive at SOAS University of

Cinematic Independence traces the emergence, demise, and rebirth of big-screen film exhibition in Nigeria. Film companies flocked to Nigeria in the

years following independence, beginning a long history of interventions by Hollywood and corporate America. The 1980s and 1990s saw a shuttering of cinemas, which were almost entirely replaced by television and direct-to-video movies. However, after 1999, the exhibition sector was revitalized with the construction of multiplexes. Cinematic Independence is about the periods that straddle this disappearing act: the immediate decades bracketing independence in 1960, and the years after 1999. At stake is the Nigerian postcolony's role in

global debates about the future of the movie theater. That it was eventually resurrected in the flashy form of the multiplex is not simply an achievement of commercial real estate, but also a testament to cinema's persistence—its capacity to stave off annihilation or, in this case, come back from the dead.

Advances in Radiation Therapy Dana Marton

Here, for the first time in more than eighty years, is a detailed study of political Antimasonry on the national, state, and local levels, based on a

survey of existing sources. The Antimasonic party, whose avowed goal was the destruction of the Masonic Lodge and other secret societies, was the first influential third party in the United States and introduced the device of the national presidential nominating convention in 1831. Vaughn focuses on the celebrated "Morgan Affair" of 1826, the alleged murder of a former Mason who exposed the fraternity's secrets. Thurlow Weed quickly transformed the

crusading spirit aroused by this incident into an anti-Jackson party in New York. From New York, the party soon spread through the Northeast. To achieve success, the Antimasons in most states had to form alliances with the major parties, thus becoming the "flexible minority." After William Wirt's defeat by Andrew Jackson in the election of 1832, the party waned. Where it had been strong, Antimasonry became a reform-minded, anti-Clay faction of the new Whig party and helped to secure the presidential

nominations of William Henry Harrison in 1836 and 1840. Vaughn concludes that although in many ways the Antimasonic Crusade was finally beneficial to the Masons, it was not until the 1850s that the fraternity regained its strength and influence. *World Report* 2005 Springer Science & Business Media THEY WERE A KIDNAPPED HEIRESS'S LAST CHANCE...
