The Ford V10 Horsepower Specifications | It Still Runs
Ford's truck V-10 is an iron-block, overhead-cam aluminum head design that uses centrally mounted spark plugs and direct fire ignition. Almost all valvetrain and accessory components are shared with the 5.4L, making the design fairly stout and easy to repair. However many 1997-2008 engines have a fatal flaw in the cylinder head.

Ford Engines - 4, 6, 8 Cylinder

Engines also 10 & 12 Cylinder

The Ford Triton V10 engine is a 10-cylinder engine with five cylinders in each bank. The engine is made of an iron block, whereas the spark plugs are made of aluminum and steel threads. Therefore, due to differences in the expansion rate of the metals when heated, the spark plugs tend to pop out because aluminum expands more than steel. ...
