The story of Ford's best-seller CreateSpace

"Since its earliest days, flight has been about pushing the limits of technology and, in many cases, pushing the limits of human endurance. The human body can be the limiting factor in the design of aircraft and spacecraft. Humans cannot survive unaided at high altitudes. There have been a number of books written on the subject of spacesuits, but the literature on the high-altitude pressure suits is lacking. This volume provides a high-level summary of the technological development and operational use of partial- and full-pressure suits, from the earliest models to the current high altitude, full-pressure suits used for modern aviation, as well as those that were used for launch and entry on the Space Shuttle. The goal of this work is to provide a resource on the technology for suits designed to keep humans alive at the edge of space."--NTRS Web site.

Ford cars can be found all over the world, and vintage models appear at most classic car shows. This book helps to identify the models sold by Ford of Britain, and provides detailed information on each model, with technical specifications, original colour photographs, and lists the colour schemes that were available. Continuing this popular series covering classic British cars, David Rowe now turns his keen eye to the British Ford models. He is well placed to do so, having worked at two Ford dealerships over a 30-year period and has driven many of the models covered by this book.

Discover the secret missions behind America's greatest conflicts. Danny Manion has been fighting his entire life. Sometimes with his fists. Sometimes with his words. But when his

actions finally land him in real trouble, he can't fight the judge who offers him a choice: jail... or the army. Turns out there's a perfect place for him in the US military: the Studies and Observation Group (SOG), an elite volunteer-only task force comprised of US Air Force Commandos, Army Green Berets, Navy SEALs, and even a CIA agent or two. With the SOG's focus on covert action and psychological warfare, Danny is guaranteed an unusual tour of duty, and a hugely dangerous one. Fortunately, the very same qualities that got him in trouble at home make him a natural-born commando in a secret war. Even if almost nobody knows he's there. National Book Award finalist Chris Lynch begins a new, explosive fiction series based on the real-life, top-secret history of US black ops.

In the 1960s the Cortina was an entirely new type of British car, light yet strong, cheap to buy yet roomy. It established a new class of car - the 'Cortina Class' - and Ford's rivals had to rush to compete. Not only was the Cortina the first, it was the best, too; a fascinating, ever-evolving project around which Ford-Europe's planning always revolved. Here, for the first time in a book, are all the facts, figures, images and legends of the Cortina story. With over 180 colour and black and white photos this is the fascinating story of a incredibly successful car.
