In the 1950s, Ford introduced a

three-tier approach to engines,

with small, mid-sized, and larger

engines aimed at different markets.

All of Ford's mainstream V8

engines were replaced by the

overhead cam Modular family in

the 1990s and the company

introduced a new large

architecture, the Boss family , for

2010.

When this system identifies an

issue it turns on the check engine

light and records an OBD code.

OBD codes are accessed by

plugging a code reader into the

vehicle's OBD port. These codes

provide a mechanic with

information about the system and

the conditions under which the

issue was first identified.
