6 cylinder. Ford was late to offer a six-cylinder engine in their cars, only introducing a six in 1941 after the failure of the 1906 Model K. The company relied on its famous Flathead V8 for most models, only seriously producing six-cylinder engines in the 1960s. The company was also late with a V6 engine, introducing a compact British V6 in 1967 but waiting until the 1980s to move their ...

### Ford Engines - Ford Pinto engine (1970-2001)

To positively identify a Ford engine, a combination of methods is required. These include comparing the engine number and the crankshaft casting number, or counting bolts on the valve cover and looking for the engine displacement stamped on the cylinder head, etc. Ford placed a tag under the coil-attaching bolt which contains all the necessary information to positively identify the engine, but ...
