This book has been written to help scientific observers identify those seabirds likely to be caught in the Southern Ocean, and takes into account the requirements of the CCAMLR Scheme of International Scientific Observation. It covers the identification of 36 species of birds from the Southern Ocean that have been caught in fishing gear or have been seen feeding from fishing boats. By carefully following the keys to identification, observers should be able to identify most seabirds caught in commercial fisheries in the Southern Ocean with confidence
