An automobile, usually called a car (an old word for carriage) or a truck, is a wheeled vehicle that carries its own engine. Older terms include horseless carriage and motor car, with "motor" referring to what is now usually called the engine. It has seats for the driver and, almost without exception, for at least one passenger. The automobile was hailed as an environmental improvement over horses when it was first introduced. Before its introduction, in New York City, over 10,000 tons of manure had to be removed from the streets daily. However, in 2006 the automobile is one of the primary sources of worldwide air pollution and cause of substantial noise and health effects.

Now, many of you have been reading this series of Shining the Light books for some time and so you are reasonably well informed about the circumstances in the U.S. and in the world regarding who is doing what to whom -- at least in an overall sense, without naming names too much. We really cannot do this because the way to

resolve these matters is not to point the finger of blame so much as to encourage you, the reader, to bring about resolution by involving yourself in spiritual capabilities to influence events in your world in the most benevolent way. That's why we've shifted off the format of the first six Shining the Light books. Let me elaborate. Those who are personally affected by the events that are occurring nowadays must not only be desirous of changing those events but must be personally and directly involved in bringing about a change in those events of the day in a way that deals directly with the impossible as an accepted fact. It's not just, "That's impossible; we can't do anything about it," but "That's impossible and we can do something about it." The objective is to move through -- not jump over, but move through -- the impossible to solutions that have no logical means to explain them. In other words, the solution is located directly in the continuity of your immortal personalities. This means that all souls can agree on the continuity and the benevolence and the value of the continuity and benevolence of life. That's how benevolent magic exists universally and beyond this universe. It doesn't make any difference what the problem is; it can be solved as long as everyone benefits. That's all. That's where you get universal cooperation. So in order to bring that about, there need to be solutions that do not ignore the problems but which also do not use the old methods of attempting to fix the problems if those methods were used to create those problems in the first place.
