Ashgate

Publishing, Ltd.

An award-

winning

scientist offers
his unorthodox

approach to
childrearing:

“ Parentology is

brilliant, jaw-
droppingly
funny, and full
of
wisdom...bound
to change your
thinking about
parenting and
its

conventions ”

(Amy Chua,
author of *Battle
Hymn of the
Tiger Mother*).

If you ' re like
many parents,
you might ask
family and

friends for
advice when

faced with
important
choices about

how to raise
your kids. You
might turn to
parenting

books or

simply rely on timeworn religious or cultural traditions. But when Dalton Conley, a dual-doctorate scientist and full-blown nerd, needed childrearing advice, he turned to scientific research to make the big decisions. In Parentology, Conley hilariously reports the results of those experiments, from bribing his kids to do math (since studies show conditional cash transfers improved educational and health outcomes for kids) to teaching them impulse control by giving them weird names (because evidence shows kids with unique names learn not to react when their peers tease them) to getting a vasectomy (because fewer kids in a family mean smarter kids). Conley encourages parents to draw on the latest cash data to rear children, if only because that level of engagement with kids will produce solid and happy ones. Ultimately these experiments are very loving, and the outcomes are redemptive—even when Conley’s sassy kids show him the limits of his profession. Parentology teaches you everything you need to know about the latest literature on parenting—with

lessons that go down easy. You ' ll be laughing and learning at the same time.
