Ford Flathead Truck Engine Harness 1932 To 1953

The american Ford V8 24 stud
Flatheads where build from 1938
to 1953. The displacement is
221, 239 or 255 cubic inch. The
biggest problem in identifying: all
engines look very similar. The
second problem is that even the
Ford literature did not care
about the year an engine was
build, just which engine will fit in
which car or truck.

**Ford flathead V8
engine - Wikipedia**

The Ford flathead V8 (often called simply the Ford flathead, flathead Ford, or flatty when the context is implicit, such as in hot-rodding) is a V8 engine of the valve-in-block type designed by the Ford Motor Company and built by Ford and various licensees.

Ford Flathead Engines for sale in UK | View 58 bargains

The Ford Flathead V-8 engine powered Ford and Mercury vehicles from 1932 to 1954. The Ford Flathead is a valve-in-block engine and the valves open adjacent to the combustion chamber,

rather than from the top, as in later engines. The four different V-8 flathead displacement sizes between 1932 and 1953 are 136, 221, 239 and 337 cubic inches.
