Vehicle, Bicycle and Pedestrian Accident Reconstruction The goal is to provide the latest technologies and methodologies being introduced into collision reconstruction - appealing to crash analysts, consultants and safety engineers alike.

Advances in Experimental Social Psychology World Almanac Education

Through a series of focus group interviews and an analysis of the media and popular culture, Mothers Work examines the institution of motherhood and the arenas in which mothering occurs. MichelleNapierski-Prancl explores shared and divergent experiences, perspectives, lives, and challenges through the voices of experts on the topic of motherhood: the mothers themselves. Mothers Work analyzes how mothers feel about themselves, each other, and the culture that situates them against one another.

The Power Surge Krause Publications

The ability to bring new and innovative products to market rapidly is the prime critical competence for any successful consumer-driven company. All industries, especially automotive, are slashing product development lead times in the current hyper-competitive marketplace.

This book is the first to thoroughly examine and analyze the truly effective product development methodology that has made Toyota the most forward-thinking company in the automotive industry. Winner of the 2007 Shingo Prize For Excellence In Manufacturing Research! In

The Toyota Product Development System: Integrating People, Process, and Technology, James Morgan and Jeffrey Liker compare and contrast the world-class product development process of Toyota with that of a U.S. competitor. They use extensive examples from Toyota and the U.S. competitor to demonstrate value stream mapping as an extraordinarily powerful tool for continuous improvement. Through examples and case studies, this book illustrates specific techniques and proven practices for dealing with challenges associated with product development, such as synchronizing multiple disciplines, multiple function workload leveling, compound process variation, effective technology integration, and knowledge management. Readers of this book can focus on optimizing the entire product development value stream rather than focus on a specific tool or technology for local improvements.

The Toyota Product Development System Springer

The Power Surge takes on the big claims made by both sides in the fight over American energy, showing what the changes underway mean for the United States and the world and explaining why the purists are often wrong. Both unfolding revolutions in American energy offer big opportunities for the country to strengthen its economy, bolster its security, and protect the environment. Levi shows how to seize those with a new strategy that blends the best of old and new energy while avoiding the real dangers that each poses. Sweeping in scope, provocative yet thoughtful, The Power Surge is necessary reading for anyone who wants to understand the changes roiling American energy, and what they mean for our future.

Daily Labor Report Elsevier

This second edition of The Human-Computer Interaction Handbook provides an updated, comprehensive overview of the most important research in the field, including insights that are directly applicable throughout the process of developing effective interactive information technologies. It features cutting-edge advances to the scientific

American Book Publishing Record Oxford University Press

This volume presents the new contexts and challenges for contemporary police leaders and managers in the changing landscapes of policing. The governance of contemporary police organisations requires leaders and managers, even at the local level, to work in and understand complex social, political and organisational environments. The wide range of topics in this collection explores what is changing, what is known about the impact of these changes and what leaders and managers now need to be able to do or anticipate as a consequence. Operational policing is no longer the militaristic singular activity it once was, but embraces new models of 'partnership' and 'community' to manage crime and disorder. Equally, while command and control models are still an essential of many aspects of policing, managing police officers and staff increasingly depends on their professional development and encouraging enthusiasm and innovation. Policing takes place under conditions of intense scrutiny from the media and from the community; and crime and disorder is the subject of much political debate. Each of these broad areas are addressed and present a surprising range of perspectives. The volume is aimed at every level of management and leadership in policing, researchers of policing and students of police management and leadership.
