PHR / SPHR Professional in Human Resources Certification Study Guide Haynes Publications

A new 'Multi-Coloured Manual' This book is a successor to and replacement for the highly respected manual and handbook on the benefits of flood and coastal risk management, produced by the Flood Hazard Research Centre at Middlesex University, UK, with support from Defra and the Environment Agency. It builds upon a previous book known as the "multi-coloured manual" (2005), which itself was a synthesis of the blue (1977), red (1987) and yellow manuals (1992). As such it expands and updates this work, to provide a manual of assessment techniques of flood risk management benefits, indirect benefits, and

coastal erosion risk management benefits. It has three key aims. First it provides methods and data which can be used for the practical assessment of schemes and policies. Secondly it describes new research to update the data and improve techniques. Thirdly it explains the limitations and complications of Benefit-Cost Analysis, to guide decision-making on investment in river and coastal risk management schemes.

Ford's Focus Mk1 was a game-changing family hatchback, setting new standards for ride, handling and driver enjoyment. The sporty ST170 was noted for being a top-notch all-rounder, while the rapid RS broke the mould for front-wheel-drive hot hatchbacks, offering outstanding ability on road or track. Today, the ST170 and Mk1 RS are highly-regarded driver's machines, while gradually gaining cult status – and increasing value – among classic collectors. But both machines suffer the potential for

rust, neglect, abuse and accident damage – which makes buying one a task that's fraught with risk. To help the would-be RS or ST driver, this quick-reference guide acts as a handy pocket-sized companion during the purchasing process. It aims to help buyers select the best car, pay the right price and avoid any pitfalls. Written by a motoring journalist, long-term fast Ford enthusiast and Focus ST owner, this one-stop package of great advice includes at-a-glance tips, illustrated in-depth inspection guidance, specifications, real-world cost considerations and even notes on which modifications to avoid.

Sponsored by the Association for Education Finance and Policy (AEFP), this groundbreaking new handbook assembles in one place the existing research-based knowledge in education finance and policy, thereby helping to define this evolving field of research and practice. It provides a readily available resource for anyone seriously involved in education finance and policy in the United States and around the world. The Handbook traces the evolution of the field from its initial focus on school inputs and the revenue sources used to finance these inputs to a focus on educational outcomes and the larger policies used to achieve them. It shows how the current decision-making context in school finance inevitably interacts with

---

those of governance, accountability, equity, privatization, and other areas of education policy. Because a full understanding of the important contemporary issues requires input from a variety of perspectives, the Handbook draws on contributors from a variety of disciplines. While many of the chapters cover complex state-of-the-art empirical research, the authors explain key concepts in language that non-specialists can understand.

'Global insurance and its rapidly evolving law and regulation demands international research. To this aim, the Handbook offers a truly international collection of essays. Highly renowned experts analyze the key topics currently under international discussion and development. While representing a diversity of national jurisdictions, the focus lies on the largest insurance jurisdictions (USA, UK and Germany) but newly important jurisdictions like Brazil and China are considered as well a most valuable and important contribution to international insurance law literature.' Manfred Wandt, Director of the Insurance Law Institute, Goethe-University Frankfurt, Germany 'This Research Handbook is

published at an opportune time. A global review of insurance law and regulation is underway. Much reform happens locally with little reference to developments elsewhere and this Research Handbook brings the strands together. It is a comprehensive review by distinguished authors from different backgrounds including both leading academics and practitioners. They consider the definitions of insurance, its economic underpinnings, comparative law and regulations, actual and proposed reforms, the effects on underwriting and claims and how insurance is studied and taught. Good laws and regulation benefit the market and its customers. Bad laws and regulation do the opposite. This book is required reading for all involved in the reform process.' David Hertzell, Law Commissioner 'Globalisation has had no greater impact in the commercial world than on insurance, the law which governs it and the risks it seeks to address. Those who inspired this publication and the contributing authors, are to be

---

thanked for providing such a necessary and useful reference source. It covers so much of what insurance professionals need to be aware of in the insurance/law world of the twenty first century.' Michael Gill, President of the International Insurance Law Association Given its economic importance, insurance is a field that has been underserved as an area of academic study. This detailed book provides much needed coverage of insurance law and regulation in its international context. Produced in association with Lloyd's, it draws on the expertise both of academics and practising lawyers. Containing 30 comprehensive chapters, it provides in-depth studies on key areas, such as the role of international organisations, the judicial interpretation of insurance contract clauses and transnational regulatory recognition. It also provides thorough introductions to important jurisdictions, including the EU, US and Japan as well as focusing on newly emerging economies such as China and Brazil. Specialist topics covered

include regulation by and of Lloyd's, the tort of bad faith in the US, microinsurance and takaful insurance. This well-documented resource will appeal to academics and students in insurance law and regulation, policymakers and private practice lawyers. The book also aims to stretch the imagination of anyone with an interest in insurance law and regulation, providing detailed analysis and avenues for further investigation.
