Rootes Cars of the 50s, 60s & 70s is the only full-colour comprehensive guide to all Hillman, Humber, Sunbeam, Singer & Talbot cars & vans, built from 1950 until the end of production in the 1970s. With model-by-model descriptions and detailed technical information, this is an invaluable Rootes resource.

Fiat & Abarth 500 & 600 Veloce Publishing Ltd

The Maserati 250F raced against Ferrari, Mercedes-Benz and Vanwall for Grand Prix supremacy during the 2500cc Grand Prix Formula years of '54-'60. Period photographs, including contributions from Tom March, are presented, along with engine cutaways, drawings, technical descriptions, and the chassis and race numbers of every 250F to have competed during this period. Stories from leading drivers who raced the 250F, including Sir Stirling Moss, Juan Fangio, and Mike Hawthorn, along with Anthony Pritchard's lively text, helps bring the racing story of this iconic model back to life.

Economic restructuring has been a notable feature of so-called mature industrial economies such as the UK and Australia in the last two decades, with deregulation, privatisation, technological change and globalisation combining to reshape such economies. Some industries have grown, while others have declined.

Moreover, while overall employment in the UK and Australia has grown, many newly-created positions require skills not found in the industries shedding labour, or are in casualised and low paid occupations. Many lesser-skilled workers leaving declining industries are therefore at risk of long-term unemployment or leaving the workforce entirely. Both mental and physical health can be affected after redundancy. It is therefore crucial that the measures put in place in many domains of social policy (such as formal health policy, employment assistance, community development, housing assistance and so on) to adequately address the difficulties confronting this group. This volume takes a closer look at the impact of manufacturing - notably automotive - plant closures in the UK (Birmingham) and Australia (Adelaide) in recent years and policy responses to those closures. It attempts to tease out differences in policy response and effectiveness, and attempts to identify areas where policy could be made to work better in terms of adjusting to large scale manufacturing change and resulting job losses. In so doing, it begins, for the first time we believe, to take a comparative approach to understanding the impact of plant closures and policy responses. This book was published as a special issue of Policy Studies.

Reprinted after a long absence! For the London to Sydney Marathon, team instructions included the recommendation that a firearm be carried by the crew of each car ... "A small pistol which can conveniently be located under cover in the car is what we have in mind" ...

High-Performance Ford Focus Builder's Handbook Veloce Publishing Ltd

The Lotus Europa was Colin Chapman and Lotus's first mid-engined road car, and was produced from 1966 through to 1975. Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in

historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars.

Backpacker brings the outdoors straight to the reader's doorstep, inspiring and enabling them to go more places and enjoy nature more often. The authority on active adventure, Backpacker is the world's first GPS-enabled magazine, and the only magazine whose editors personally test the hiking trails, camping gear, and survival tips they publish. Backpacker's Editors' Choice Awards, an industry honor recognizing design, feature and product innovation, has become the gold standard against which all other outdoor-industry awards are measured.

Plunkett Research, Ltd.

An in-depth look at Citroen's idiosyncratic DS, for sixty years a design icon and one of the world's most controversial, radical, idiosyncratic and technically advanced motorcars. This popular book has now been re-issued in revised and updated paperback form.

Revised and updated edition Routledge

This book covers the entire history, life and times of the famous British high-performance engineering company, from its 1958 foundation by Mike Costin and Keith Duckworth, through its often-exciting and always fascinating evolution, to its expansion and worldwide success in both motorsport and high-performance road car production.

Modern cars are more computerized than ever. Infotainment and navigation systems, Wi-Fi, automatic software updates, and other innovations aim to make driving more convenient. But vehicle technologies haven't kept pace with today's more hostile security environment, leaving millions vulnerable to attack. The Car Hacker's Handbook will give you a deeper understanding of the computer systems and embedded software in modern vehicles. It begins by examining vulnerabilities and providing detailed explanations of communications over the CAN bus and between devices and systems. Then, once you have an understanding of a vehicle's communication network, you'll learn how to intercept data and perform specific hacks to track vehicles, unlock doors, glitch engines, flood communication, and more. With a focus on low-cost, open source hacking tools such as Metasploit, Wireshark, Kayak, can-utils, and ChipWhisperer, The Car Hacker's Handbook will show you how to: –Build an accurate threat model for your vehicle –Reverse engineer the CAN bus to fake engine signals –Exploit vulnerabilities in diagnostic and data-logging systems –Hack the ECU and other firmware and embedded systems –Feed exploits through infotainment and vehicle-to-vehicle communication systems –Override factory settings with performance-tuning techniques –Build physical and virtual test benches to try out exploits safely If you're curious about automotive security and have the urge to hack a two-ton computer, make The Car Hacker's Handbook your first stop.

No Starch Press

Diagnostics, or fault finding, is a fundamental part of an automotive technician's work, and as automotive systems become increasingly complex there is a greater need for good diagnostic skills. Advanced Automotive Fault Diagnosis is the only book to treat automotive diagnostics as a science rather than a check-list procedure. Each chapter includes basic principles and examples of a vehicle system followed by the appropriate diagnostic techniques, complete with useful diagrams, flow charts, case studies and self-assessment questions. The book will help new students develop diagnostic skills and help experienced technicians improve even further. This new edition is fully updated to the latest technological developments. Two new chapters have been added – On-board diagnostics and

Oscilloscope diagnostics – and the coverage has been matched to the latest curricula of motor vehicle qualifications, including: IMI and C&G Technical Certificates and NVQs; Level 4 diagnostic units; BTEC National and Higher National qualifications from Edexcel; International Motor Vehicle qualifications such as C&G 3905; and ASE certification in the USA.

Available again after a long absence! Always big on character and charm, Fiat's little cars played an important international roll in providing affordable and practical private transport for millions who had previously thought their dream impossible. With particular emphasis on the now classic 600 and Nuova 500 cars, this book tells the full story of these 'baby' Fiats. Built, and exported to, many countries outside of the marque's native Italy, over 6.5 million Topolinos, 600s and Nuova 500s were sold, and an amazing number survive to this today. Also covered are the wonderful models built on these cars' tiny chassis by Italy's leading coachbuilders, and the motorsport success achieved by the Abarth versions of the little cars that everybody loves.
