"This ethnography is more like a film than a book, so well does Stoller evoke the color, sight, sounds, and movements of Songhay possession ceremonies."—Choice "Stoller brilliantly recreates the reality of spirit presence; hosts are what they mediate, and spirits become flesh and blood in the 'fusion' with human existence. . . . An excellent demonstration of the benefits of a new genre

of ethnographic writing. It expands our understanding of the harsh world of Songhay mediums and sorcerers."—Bruce Kapferer, American Ethnologist "A vivid story that will appeal to a wide audience. . . . The voices of individual Songhay are evident and forceful throughout the story. . . . Like a painter, [Stoller] is concerned with the rich surface of things, with depicting images, evoking sensations, and enriching perceptions. . . . He has succeeded admirably." —Michael Lambek, American Anthropologist "Events (ceremonies and life histories) are evoked in cinematic style. . . . [This book is] approachable and absorbing—it is well written, uncluttered by jargon and elegantly structured."—Richard Fardon, Times Higher Education Supplement "Compelling, insightful, rich in ethnographic detail, and worthy of becoming a classic in the scholarship on Africa."—Aidan Southall, African Studies Review

As U.S. and Canadian automakers and dealers face bankruptcy and Toyota battles unprecedented quality-control problems, Lemon-Aid guides steer the confused and anxious buyer through the economic meltdown unlike any other car-and-truck books on the market. Phil Edmonston, Canada's automotive "Dr. Phil" for more than 40 years, pulls no punches. In this all-new guide he says: Chrysler's days are numbered with the dubious help of Fiat. Electric cars and ethanol power are PR gimmicks. Diesel and natural gas are the future. Be wary of "zombie" vehicles: Jaguar, Land Rover, Saab, and Volvo. Mercedes-Benz -- rich cars, poor quality. There's only one Saturn

you should buy. Toyota -- enough apologies: "when you mess up, 'fess up."

Machining is an essential part of high-performance engine building and stock rebuilding, as well as certain servicing procedures. Although you may not own the expensive tooling and machining to perform all or any of the machining required for a quality build, you need to understand the principles, procedures, and goals for machining, so you can guide the machining process when outsourced. Classic and older engines typically require extensive machining and almost every major component of engine, including block, heads, intake, crankshaft, and pistons, require some sort of machining and fitment. A detailed, authoritative, and thorough automotive engine-machining guide for the hard-core enthusiast has not been available until now. Mike Mavrigian, editor of Engine Building Professional, walks you through each

important machining procedure. A stock 300-hp management, remote sensing, target engine build has far different requirements than a 1,000-hp drag race engine, and Mavrigian reveals the different machining procedures and plans according to application and engine design. The author also shows you how to inspect, measure, and evaluate components so you can provide astute guidance and make the best machine work choices. Machining procedures included are cylinder boring, align boring/honing, decking, valvseat cutting, cam tunnel boring, and a multitude of other services. In addition, multi-angle valve jobs, setting the valvseats, altering rocker arm ratio, re-conditioning connecting rods, and machining and matching valvetrain components are also covered.

Whether you're an enthusiast engine builder or prospective machining student who wants to pursue a career as an automotive machinist, this book will provide insight and in-depth instruction for performing the most common and important machining procedures.
