Fusion Research is a careful,  
scholarly account of the  
course of fusion energy  
research over the past fifty  
years. The authors outline the  
different paths followed by  
fusion research from initial  
ignorance to present  
understanding. They explore  
why a particular scheme  
would not work and why it  
was more profitable to  
concentrate on the

Design Engineering Manual offers  
a practical guide to the key  
principles of design engineering. It  
features a compilation of extracts  
from several books within the  
range of Design Engineering books  
in the Elsevier collection. The book  
is organized into 11 sections.

Beginning with a review of the  
processes of product development  
and design, the book goes on to  
describe systematic ways of  
choosing materials and processes. It  
details the properties of modern  
metallic alloys including  
commercial steels, cast irons,  
superalloys, titanium alloys,  
structural intermetallic compounds,  
and aluminum alloys. The book  
explains the human/system  
interface; procedures to assess the  
risks associated with job and task  
characteristics; and environmental  
factors that may be encountered at  
work and affect behavior. Product  
liability and safety rules are  
discussed. The final section on  
design techniques introduces the  
design process from an inventors  
perspective to a more formal model  
called total design. It also deals with  
the behavior of plastics that  
influence the application of  
practical and complex engineering  
equations and analysis in the design  
of products. Provides a single-  
source of critical information to the

Organized around common rhetorical situations that occur all around us, **INVENTING ARGUMENTS** shows students that argument is a living process rather than a form to be modeled. The text's focus on invention teaches students to recognize the rhetorical elements of any argumentative situation and apply the tools of argument effectively in their own writing. Students are introduced to the basic layers of argument in early chapters, with material arranged into increasingly sophisticated topics beginning with the most obvious or explicit layers (claims) and moving to the more implied layers of assumptions, values, beliefs, and ideology. By the time they finish Part I, your students will have a thorough understanding of argument, which they can then apply to the invention projects in Chapters 7 – 12. This edition has been updated to reflect guidelines from the 2016 **MLA HANDBOOK**, Eighth Edition. The inside story of the epic turnaround of Ford Motor Company under the leadership of CEO Alan Mulally. At the end of 2008, Ford Motor Company was just months away from running out of cash. With the auto industry careening toward ruin, Congress offered all three Detroit automakers a bailout. General Motors and Chrysler grabbed the taxpayer lifeline, but Ford decided to save itself. Under the leadership of charismatic CEO Alan Mulally, Ford had already put together a bold plan to unify its divided global operations,

transform its lackluster product lineup, and overcome a dysfunctional culture of infighting, backstabbing, and excuses. It was an extraordinary risk, but it was the only way the Ford family—America's last great industrial dynasty—could hold on to their company. Mulally and his team pulled off one of the greatest comebacks in business history. As the rest of Detroit collapsed, Ford went from the brink of bankruptcy to being the most profitable automaker in the world. *American Icon* is the compelling, behind-the-scenes account of that epic turnaround. In one of the great management narratives of our time, Hoffman puts the reader inside the boardroom as Mulally uses his celebrated Business Plan Review meetings to drive change and force Ford to deal with the painful realities of the American auto industry. Hoffman was granted unprecedented access to Ford's top executives and top-secret company documents. He spent countless hours with Alan Mulally, Bill Ford, the Ford family, former executives, labor leaders, and company directors. In the bestselling tradition of *Too Big to Fail* and *The Big Short*, *American Icon* is narrative nonfiction at its vivid and colorful best.

"This ethnography is more like a film than a book, so well does Stoller evoke the color, sight, sounds, and movements of Songhay possession ceremonies."—Choice

"Stoller brilliantly recreates the reality of spirit presence; hosts are what they mediate, and spirits become flesh and blood in the 'fusion' with human existence. . . . An excellent demonstration of the benefits of a new genre of ethnographic writing. It expands our understanding of the harsh world of Songhay mediums and sorcerers."—Bruce Kapferer, American Ethnologist

"A vivid story that will appeal to a wide audience. . . . The voices of individual Songhay are evident and forceful throughout the story. . . . Like a painter, [Stoller] is concerned with the rich surface of things, with depicting images, evoking sensations, and enriching perceptions. . . . He has succeeded admirably." —Michael Lambek, American Anthropologist

"Events

[This book is] approachable and absorbing—it is well written, uncluttered by jargon and elegantly structured."—Richard Fardon, *Times Higher Education Supplement* "Compelling, insightful, rich in ethnographic detail, and worthy of becoming a classic in the scholarship on Africa."—Aidan Southall, *African Studies Review*
