On a Ford 172 or Ford 192

industrial engine the distributor drive rod performs a very important function. This Ford 172 distributor drive shaft is a hex sided shaft made of hardened steel, 3.93 " long with chamfered ends. This drive rod connects the distributor with the oil pump. The Ford 172 or 192 engine ' s cam gear drives the distributor which then through this short shaft drives the oil pump.

Ford Industrial Engines
Ford started using the 172 cid 4 cylinder gas engine in the mid 50's and it is a very popular engine with a vast supply in boneyards. The engine was used on everything from pumps, welders, air compressors, and just about anything else industrial too as well as skid steer loaders. The cylinder bore is 3.90" and stroke is 3.60".

How you identify Ford
industrial engines depends on
the engine in question, and
finding the casting number is
your primary challenge. The
casting number may be in
several locations. Ford marks its
industrial engines according to
the same general system as it
does those for automobile and
truck engines.

Ford 192 - Steiner Tractor
Parts

The Ford 172 engines were
made with heavy-duty
aluminum pistons, each with
three compression and two
oil rings for maximum high-
pressure efficiency. Its forged-
steel crankshaft was heat
treated for strength and
rigidity with three main
bearings lined with copper-
lead.
