This factory written Detroit Iron shop manual is perfect for the restorer or anyone working on one of these vehicles. 1953 Ford Truck Shop Manual Detroit Iron While millions of Ford rear-wheel-drive cars are equipped with the durable and simple C4 and C6 transmissions of the 1960s, early in the

1980s Ford replaced those old designs with the AOD transmission for a new generation of cars. Overdrive gears, once popular before WWII, were now becoming popular again, as manufacturers were under increasing pressure to raise fuel economy to meet ever more demanding EPA standards. A nice byproduct of that was more comfortable cruising speeds, where your engine didn't have

to work so hard in addition to getting better fuel economy. In Ford AOD Transmissions: Rebuilding and Modifying the AOD, AODE and 4R70W, author George Reid walks you through the process step-by-step, from removing the transmission from the vehicle, to complete disassembly and cleaning, to careful reassembly, to proper re-installation and road

testing. Performance modifications are also covered, as well as an ID guide for various model numbers, evolutionary design changes, shift kit installation, and torque converter selection. This book is ideal for people who already have one of these transmissions in their car, as well as enthusiasts who would like to swap one of these more modern units into an older

chassis to get all the benefits of overdrive. If you plan on researching or working on any one of these overdrive models, this book is a vital addition to your workbench or library. 1972 Ford Truck Shop Manual (5 Volume Set) Detroit Iron This book covers the vast majority of Powerstroke Diesel engines on the road, and gives you the full story on their design. Each part of the engine is described and discussed in detail, with full-color photos of every critical component. A

full and complete step-by-step engine rebuild is also included. 1958 Ford Car Shop Manual Detroit Iron This 1957 Ford Car and Thunderbird Shop Manual is a high-quality, licensed PRINT reproduction of the service manual authored by Ford Motor Company and published by Detroit Iron. This OEM factory manual is 8.5 x 11 inches, paperback bound, shrink-wrapped and contains 496 pages of comprehensive

mechanical instructions with detailed diagrams, photos and specifications for the mechanical components of your vehicle such as the engine, transmission, suspension, brakes, fuel, exhaust, steering, electrical and drive line. Service / repair manuals were originally written by the automotive manufacturer to be used by their dealership mechanics. The following 1957 Ford models are covered: Country Squire, Thunderbird, Fairlane,

Custom, Custom 300, Sunliner, Skyliner, Del Rio Wagon, Country Sedan, Ranchero. This factory written Detroit Iron shop manual is perfect for the restorer or anyone working on one of these vehicles.
