In the summer of 1909, seventeen-year-old Nell Golightly is the new maid at the Orchard Tea Gardens in Cambridgeshire when Rupert Brooke moves in as a lodger. Famed for his looks and flouting of convention, the young poet captures the hearts of men and women alike, yet his own seems to stay intact. Even Nell, despite her good sense, begins to fall for him. What is his secret? This captivating novel gives voice to Rupert Brooke himself in a tale of mutual fascination and inner turmoil, set at a time of great social unrest. Revealing a man far more complex and radical than legend suggests, it powerfully conveys the allure - and curse - of charisma.

'A must-read for the modern Mum; particularly one who has aspirations to build her own business. I wish I had been able to read it three years ago!' Katie Massie-Taylor, Co-Founder, *Mush Union Review* David and Charles Homogeneous charge compression ignition (HCCI)/controlled auto-ignition (CAI) has emerged as one of the most promising engine technologies with the

potential to combine fuel efficiency and improved emissions performance, offering reduced nitrous oxides and particulate matter alongside efficiency comparable with modern diesel engines. Despite the considerable advantages, its operational range is rather limited and controlling the combustion (timing of ignition and rate of energy release) is still an area of on-going research. Commercial applications are, however, close to reality. HCCI and CAI engines for the automotive industry presents the state-of-the-art in research and development on an international basis, as a one-stop reference work. The background to the development of HCCI / CAI engine technology is described. Basic principles, the technologies and their potential applications, strengths and weaknesses, as well as likely future trends and sources of further information are reviewed in the areas of gasoline HCCI / CAI engines; diesel HCCI engines; HCCI / CAI engines with alternative fuels; and advanced modelling and experimental techniques. The book provides an invaluable source of information for scientific researchers, R&D engineers and managers in the automotive engineering industry worldwide. The Great Lover John Wiley & Sons
The birth of a Grand Prix team does not occur every day -- or every season for that matter, Formula 1 is an extremely difficult business to break into, and very few new arrivals survive beyond their first year. That's why the racing world took note in 1997 when a new team bearing the name of race legend Jackie Stewart gained a foothold in the sport. The team has, in fact, been in the news since 1996, when Stewart and his son, Paul, first announced their intentions. Racing Stewart tells the story of this remarkable adventure, charting in full for the first time ever, the birth of a Grand Prix challenger. Hamilton and Nicholson were granted unparalleled access to the team from Stewart's initial decision, giving them a behind-the-scenes look at the peaks and valleys that are an inevitable part of gaining acceptance in this ruthless sport. *Autocar* Haynes Publishing

In May 1958, one of the

world's largest motor manufacturers unveiled a diminutive two-seater that would take the world by storm. Small in stature yet able to punch well above its weight, the Austin-Healey Sprite rapidly gained an enthusiastic following among keen drivers, as well as an impressive record in competition. Being neither expensive nor exotic, for many motorists the Sprite opened the door to sports car ownership and, in so doing, its commercial success was almost guaranteed. With over 250 photographs, this book includes: the genesis of the Sprite, from the Austin Seven and pre-war MG Midget, via Donald Healey's Riley- and Nash-engined models, to the Austin A30, A90 Atlantic and Healey Hundred. The development, launch and market reception is covered along with details of the evolution from Mk I to Mk IV, including the Frogeye and restyled ADO 41. Rallies, racing and record breaking details are given as well as information on modifications, special-bodied variants, replicas and finally, buying and restoring a Sprite today.

The epic story also told in the film *FORD V. FERRARI*: By the early 1960s, the Ford Motor Company, built to bring automobile transportation to the masses, was falling behind. Young Henry Ford II, who had taken the reins of his

grandfather's company with little business experience to speak of, knew he had to do something to shake things up. Baby boomers were taking to the road in droves, looking for speed not safety, style not comfort. Meanwhile, Enzo Ferrari, whose cars epitomized style, lorded it over the European racing scene. He crafted beautiful sports cars, "science fiction on wheels," but was also called "the Assassin" because so many drivers perished while racing them. Go Like Hell tells the remarkable story of how Henry Ford II, with the help of a young visionary named Lee Iacocca and a former racing champion turned engineer, Carroll Shelby, concocted a scheme to reinvent the Ford company. They would enter the high-stakes world of European car racing, where an adventurous few threw safety and sanity to the wind. They would design, build, and race a car that could beat Ferrari at his own game at the most prestigious and brutal race in the world, something no American car had ever done. Go Like Hell transports readers to a risk-filled, glorious time in this brilliant portrait of a rivalry between two industrialists, the cars they built, and the "pilots" who would drive them to victory, or doom.
