Elementary Number Theory McGraw-Hill Education In what is widely considered the most influential book ever written by Walter Lippmann, the late journalist and social critic

provides a fundamental treatise on the nature of human information and communication. The work is divided into eight parts, covering such varied issues as stereotypes, image making, and organized intelligence. The study begins with an analysis of "the world outside and the pictures in our heads", a leitmotif that starts with issues of censorship and privacy, speed, words, and clarity, and ends with a careful survey of the modern newspaper. Lippmann's conclusions are as meaningful in a world of television and computers as in the earlier period when newspapers were dominant. Public Opinion is of enduring significance for communications scholars, historians, sociologists, and political scientists. Copyright © Libri GmbH. All rights reserved.
