Americans take for granted that ours is the very model of a democracy. At the core of this belief is the assumption that the right to vote is firmly established. But in fact, the United States is the only major democratic nation in which the less well-off, the young, and minorities are substantially underrepresented in the electorate.

Frances Fox Piven and Richard A. Cloward were key players in the long battle to reform voter registration laws that finally resulted in the National Voter Registration Act of 1993 (also known as the Motor Voter law). When *Why Americans Don't Vote* was first published in 1988, this battle was still raging, and their book was a fiery salvo. It demonstrated that the twentieth century had witnessed a concerted effort to restrict voting by immigrants and blacks through a combination of poll taxes, literacy tests, and unwieldy voter registration requirements. *Why Americans Still Don't Vote* brings the story up to the present. Analyzing the results of voter registration reform, and drawing compelling historical parallels, Piven and Cloward reveal why neither of the major parties has tried to appeal to the interests of the newly registered—and thus why Americans still don't

vote.

**INSURANCE HANDBOOK FOR THE MEDICAL OFFICE** is a key text for medical administrative assisting, medical front office programs, or those who wish to become insurance billing specialists, claims assistance professionals, or electronic claims processors for physicians' practices and hospital outpatient clinics. Those already practicing in this area will also find this text beneficial, as will health claims examiner programs. The goal of this extremely up-to-date text is to increase efficiency and streamline administrative procedures for the most exasperating aspect of the doctor's office routine: insurance billing. This text offers guidance for all aspects of submitting, tracing, appealing, and transmitting claims for today's full range of health plans. Important coverage of diagnostic coding, procedural coding, office and insurance collection strategies, Medicare, Managed Care, and more is presented. Additionally, a free CD-ROM featuring the HCFA-1500 claim form is included with the book. The CD-ROM contains 10 scored patient case studies with related insurance information so that the student can practice completing the HCFA-1500 claim form in a fun, interactive format. This edition of the Fordney text is full colour (and is the first text in this discipline to use this format). This full-color format will help the students identify each insurance payer with a specific color and icon, thus making the learning process more effective. The text has been updated to reflect recent changes in procedural coding for government programs and the private sector. Also in this edition, the text has been completely rewritten by the author to emphasize procedural (CPT and HCPCS) and diagnostic (ICD-9-CM) coding and documentation which are the keystones to obtaining maximum reimbursement.

New insights for investors and business people looking to create wealth in the turbulent post-crisis world In a no holds barred expose of the 2008 financial meltdown from the inside, Ziad K. Abdelnour argues that the political and financial elites have done nothing to fix the structural problems and instead have worsened the situation. By creating more market bubbles, they are actually waging a war on the most productive members of society. For investors, business people, and entrepreneurs that need to navigate the troubled geopolitical waters of the post-crisis world, Abdelnour offers several solutions, including looking at the world anew and understanding that the federal government's primary objective is to promote the creation of an environment conducive to the creation of wealth not job creation, not bailouts, not subsidies, not expansion of the federal bureaucracy, and not providing lifetime support to those who choose not to take advantage of the innumerable opportunities that exist in this nation for them to create a better, more productive life for themselves. Making America: A History of the United States, Volume II: Since 1865 Elsevier Health Sciences

This first edition of this book was a broad study, drawing on a wide range of published research and historical evidence, of the enormous stock market boom that started around 1982 and picked up incredible speed after 1995. Although it took as its specific starting point this ongoing boom, it placed it in the context of stock market booms generally, and it also made concrete suggestions regarding policy changes that should be initiated in response to this and other such booms. The book argued that the boom represents a speculative bubble, not grounded in sensible economic fundamentals. Part one of the book considered structural factors behind the boom. A list of twelve precipitating factors that appear to be its ultimate causes was given. Amplification mechanisms, naturally-occurring Ponzi processes, that enlarge the effects of these precipitating factors, were described. Part Two discussed cultural factors, the effects of the news media, and of "new era" economic thinking. Part Three discussed psychological factors, psychological anchors for the market and herd behavior. Part Four discussed attempts to rationalize exuberance: efficient markets theory and theories that investors are learning. Part Five presented policy options and actions that should be taken. The second edition, 2005, added an analysis of the real estate bubble as similar to the stock market bubble that preceded it, and warned that "Significant further rises in these markets could lead, eventually, to even more significant declines. The bad outcome could be that eventual declines would result in a substantial increase in the rate of personal bankruptcies, which could lead to a secondary string of bankruptcies of financial institutions as well. Another long-run consequence could be a decline in consumer and business confidence, and another, possibly worldwide, recession." Thus, the second edition of this book was among the first to warn of the global financial crisis that began with the subprime mortgage debacle in 2007
