Written by a generation of post-colonial scholars, it attempts to unravel some of the historical problems of the colonial era.

Again and again the authors focus on the relationship of the ilustrados and the Americans, on the problems of continuity and discontinuity, and on the meaning of "modernization" in the Philippine context. As part of the Vietnam generation, these authors have looked at American imperialism with a new perspective, and yet their analysis is tempered, not strident, and reflective, not dogmatic. Perhaps the most central theme to emerge is the depth of the contradiction inherent in the American colonial experiment. [vi-vii]

"Tonopah, Nevada, lies within the Great Basin region, an immense arid to semiarid area of 400,000 square miles extending between the Sierra Nevada and the Rocky Mountains. The environments -- roughly parallel mountain ranges and long desert basins -- makes harsh demands on its inhabitants. This history of Tonopah, which begins with a look at the land and its early inhabitants -- the pre-Archaic and Archaic Indian populations and the Western Shoshone, then vividly describes the arrival of white explorers, the discovery of silver, and the boomtown days of the mining camp.... Spanning most of the years of the one-party South, the public career of Virginian Claude A. Swanson, congressman, governor, senator, and secretary of the navy, extended from the second administration of Grover Cleveland into that of Franklin Roosevelt. His record, writes Henry C. Ferrell, Jr., in this definitive biography, is that of "a skillful legislative diplomat and an exceedingly wise executive encompassed in the personality of a professional politician." As a congressman, Swanson abandoned Cleveland's laissez faire doctrines to become the leading Virginia spokesman for William Jennings Bryan and the Democratic platform of 1896. His

achievements as a reform governor are equaled by few Virginia chief executives. In the Senate, Swanson worked to advance the programs of Woodrow Wilson. In the 1920s, he contributed to formulation of Democratic alternatives to Republican policies. In Roosevelt's New Deal cabinet, he helped the Navy obtain favorable treatment during a decade of isolation. The warp and woof of local politics are well explicated by Ferrell to furnish insight into personalities and events that first produced, then sustained, Swanson's electoral success. He examines Virginia educational, moral, and social reforms; disfranchisement movements; racial and class politics; and the impact of the woman's vote. And he records the growth of the Hampton Roads military-industrial complex, which Swanson brought about. In Virginia, Swanson became a dominant political figure, and Ferrell's study challenges previous interpretations of Virginia politics between 1892 and 1932 that pictured a powerful, reactionary Democratic "Organization," directed by Thomas Staples Martin and his successor Harry Flood Byrd, Sr., defeating would-be progressive reformers. A forgotten Virginia emerges here, one that reveals the pervasive role of agrarians in shaping the Old Dominion's politics and priorities.

With a new Afterword on the current state of the stock market, the ongoing debate over the "new economy," and the larger implications of "irrational exuberance." In this controversial, hard-hitting account of today's explosive market, Robert J. Shiller, a leading expert on market volatility, evokes Alan Greenspan's infamous 1996 reference, "irrational exuberance," to explain the alternately soaring and declining stock market. Shiller's unconventional yet persuasive argument credits an unprecedented confluence of events with driving stocks to uncharted heights, and he analyzes the structural, cultural, and psychological factors behind these levels of growth not reflected in any other sector of the economy. Now more relevant than ever, this analysis is both chilling and convincing—a must-read for the individual investor, the policy maker, and the investment professional.

How can international trade agreements promote development and how can rules be designed to benefit poor countries? Can multilateral trade cooperation in the World Trade Organization (WTO) help developing countries create and strengthen institutions and regulatory regimes that will enhance the gains from trade and integration into the global economy? And should this even be done? These are questions that confront policy makers and citizens in both rich and poor countries, and they are the subject of *Economic Development and Multilateral Trade Cooperation*. This book analyzes how the trading system could be made more supportive of economic development, without eroding the core WTO functions.

Collectively, mankind has never had it so good despite periodic economic crises of which the current sub-prime crisis is merely the latest example. Much of this success is attributable to the increasing efficiency of the world's financial institutions as finance has proved to be one of the most important causal factors in economic performance. In a series of insightful essays, financial and economic historians examine how financial innovations from the seventeenth century to the present have continually challenged

established institutional arrangements, forcing change and adaptation by governments, financial intermediaries, and financial markets. Where these have been successful, wealth creation and growth have followed. When they failed, growth slowed and sometimes economic decline has followed. These essays illustrate the difficulties of coordinating financial innovations in order to sustain their benefits for the wider economy, a theme that will be of interest to policy makers as well as economic historians.
