Faces of Internationalism Routledge

This book offers a bold re-interpretation of the prevailing narrative that US foreign policy after the Cold War was a failure. In chapters that retell and re-argue the key episodes of the post-Cold War years, Lynch argues that the Cold War cast a shadow on the presidents that came

after it and that success came more from adapting to that shadow than in attempts to escape it. When strategic lessons of the Cold War were applied, presidents fared better; when they were forgotten, they fared worse. This book tells the story not of a revolution in American foreign policy but of its essentially continuous character from one era to the next. While there were many setbacks between the fall of Soviet communism and the opening years of the Trump administration, from Rwanda to 9/11 and Iraq to Syria, Lynch demonstrates that the US remained the world's dominant power.

The complex interplay between domestic and international factors is highlighted. In *Faces of Internationalism*, Eugene R. Wittkopf examines the changing nature of public attitudes toward American foreign policy in the post-Vietnam era and the role that public opinion plays in the American foreign policymaking process. Drawing on new data—four mass and four elite opinion surveys

undertaken by the Chicago Council of Foreign Relations from 1974 to 1986—combined with sophisticated analysis techniques, Wittkopf offers a pathbreaking study that addresses the central question of the relationship of a democracy to its foreign policy. The breakdown of the “consensus” approach to American foreign policy after the Cold War years has become the subject of much analysis. This study contributes to revisionist scholarship by describing the beliefs and preferences that have emerged in the wake of this breakdown. Wittkopf counters traditional views by demonstrating the persistence of U.S. public opinion defined by two dominant and distinct attitudes in the post-Vietnam war years—cooperative and militant internationalism. The author explores the nature of these two “faces” of internationalism, focusing on the extent to which elites and masses share similar opinions and the political and sociodemographic correlates of belief systems. Wittkopf also offers an original examination of the relationship between beliefs and preferences. *Containment and the Cold War: American Foreign Policy Since 1945* Woodrow Wilson Center Press

"A superb book....Mearsheimer has made a significant contribution to our understanding of the behavior of great powers."—Barry R. Posen, *The National Interest* The updated edition of this classic treatise on the behavior of great powers takes a penetrating look at the question likely to dominate international relations in the twenty-first century: Can China rise peacefully? In clear, eloquent prose, John Mearsheimer explains why the answer is no: a rising China will seek to dominate Asia, while the United States, determined to remain the world's sole regional hegemon, will go to great lengths to prevent that from happening. The tragedy of great power politics is inescapable.

The Cold War Springer

This book investigates the end of the Cold War in Africa and its impact on post-Cold War US foreign policy in the continent. The fall of the Berlin Wall is widely considered the end of the Cold War; however, it documents just one of the many "ends", since the Cold War was a global conflict. This book looks at one of the most neglected extra-European battlegrounds, the African continent, and explores how American foreign policy developed in this region between the late 1980s and the early 1990s. Drawing on a wide range of recently disclosed documents, the book shows that the Cold War in Africa ended in 1988, preceding the fall of the Berlin Wall. It also reveals how, since then, some of the most controversial and inconsistent episodes of post-Cold War US foreign policy in Africa have been deeply rooted in the unique process whereby American rivalry with the USSR found

its end in the continent. The book challenges the traditional narrative by presenting an original perspective on the study of the end of the Cold War and provides new insights into the shaping of US foreign policy during the so-called 'unipolar moment'. This book will be of much interest to students of Cold War history, US foreign policy, African politics and international relations.
