"Forensic Examination of Documents: Expert Report and Testimony" is the second book of the series "Forensic Notes." This series was created in order to provide practical information on basic and necessary steps in forensic document examinations. The books in the series are designed for a wide range of users: forensic document examiners, trial attorneys, legal professionals, police officers, investigators, law students. What expert witnesses should expect from lawyers and lawyers from expert witnesses in their court testimony. This is the subject of this book. The central place in the book is given to the expert report since it is the grounds on which expert testimony in court should be set up. Issues concerning its structure, content, requirements in the formulation and justification of the expert conclusions are discussed. Furthermore, are examined three groups of questions: - The typical errors in the examination of documents and flaws of the expert report; - The organization of the expert's interrogation (direct and cross) and objections at the hearing; - The sets of 365 typical questions that forensic document examiners may be asked at their court testimony. A large part of the book is presented primarily as a "bullet list" rather than in full-text format. However, each point is essential and every word important for effective expert witness testimony. The

book gives enough breadth of knowledge to apply to the continuously changing landscape of forensic document examination. The book is designed for the daily work of practitioners - forensic document examiners and trial attorneys. It gives checklists on what to do on all essential tasks about the testimony of the forensic document examiner. Many of the issues discussed in the book are from expert casework and attorneys practice of the author or from his academic experience. The book offers plenty of examples and 7 figures to illustrate the thesis of the author.

The Most Dangerous Animal of All was co-written by the estranged son of California's infamous Zodiac killer to reveal his father's true identity. When the book hit the streets the skeptics were in full force. Just like those who mocked the boy who cried wolf, no one could blame them. Too many people had already claimed to either be the killer or to know who he really was. The problem is-the skeptics weren't considering the handwriting comparisons skillfully performed by Document Examiner, Michael Wakshull, to finally crack the case. The End of the Zodiac Mystery will enable you to reach your own conclusion whether this decades-long cold case has finally been solved. In it, Wakshull walks you step-by-step through his intriguing forensic analysis, revealing the methodology he used to solve the case other document examiners refused to accept. There is a twist to every story, and his methodology required a twist, too, in order to ensure a credible conclusion.

Where The Most Dangerous Animal of All leaves off, The End of the Zodiac Mystery picks up, sharing actual handwriting comparisons between Earl Van Best Jr. and the self-named Zodiac killer. It is virtually certain the documents were written by the same man. If you like surprise endings, don't start reading from the back of the book. Save the thrill in the epilogue for the end!

What She Saw Charles C Thomas Publisher

When Professor Madeleine Maynard is brutally murdered, handwriting expert Claudia Rose journeys to Maine to retrieve her manuscript about the life of convicted female serial killer, Roxanne Becker. While there, Claudia uncovers a shocking secret about a group of grad students dubbed "Maynard's Maniacs" who were selected for a special project. Was Madeleine conducting research that was at best, unprofessional—and at worst, downright harmful, and potentially dangerous? Could that research have turned deadly? Claudia finds herself swept up in the mystery of Madeleine's life and death, soon realizing that Madeleine left behind more questions than answers, and no shortage of suspects. Her academic success and personal fortune made her the envy of fellow faculty members. The University where she worked anticipates being the beneficiary of Madeline's estate. But when a stranger claiming to be Madeleine's nephew turns up brandishing a new will, all bets are off. Rushing back to Madeleine's isolated house after the local

police chief asks her to examine the handwritten will, Claudia becomes trapped in a blizzard. With a killer.

This second edition of Bates' *I.S.Q.D.* updates and expands the previous volume and continues to reflect the scientific method of detecting whether a writing is genuine or forged. This book serves as a guide and reference for the investigator or examiner in matters relating to the identification of handwriting. In and of itself, it is not intended in any way to qualify an individual as an expert, but is to be used as a tool with which to assist in the discovery and proof of fact. These are the two essential parts of handwriting comparison. Divided into three sections, the book presents the twelve points of comparison and the method of making a scientific analysis, a guide for presentation of facts in court, and a sample demonstration of the discovery and proof of fact. Once these points of comparison have been determined, the examiner has a basis from which to offer an opinion. This book can be used as a primary text in questioned document examinations, and will be an excellent resource for law enforcement agencies, including private and industrial investigative groups
