Wildflowers of the Atlantic Southeast Read Books Ltd
Readers of this expansive, three-volume encyclopedia will gain scientific, sociological, and demographic insight into the complex relationship between plants and humans across history. Comprising three volumes and approximately half a million words, this work is likely the most comprehensive reference

of its kind, providing detailed information not only about specific plants and food crops such as barley, corn, potato, rice, and wheat, but also interdisciplinary content that draws on the natural sciences, social sciences, and humanities. The entries underscore the fascination that humans have long held for plants, identifies the myriad reasons why much of life on earth would be impossible without plants, and points out the intertwined relationship of plants and humans—and how delicate this balance can be. While the majority of the content is dedicated to the food plants that are essential to human existence, material on ornamentals, fiber crops, pharmacological plants, and carnivorous plants is also included.

Sitka Rose CRC Press

This book is an up-to-date checklist of the current valid taxonomy for all vascular plants, bryophytes, and lichens in British Columbia, including synonyms, species codes, and other information. A convenient, geographically restricted, comprehensive checklist like this one will aid greatly in avoiding the present confusion concerning the names of many species in the ecological and systematic literature, as well as in applied fields. The book is organized into three sections. Part 1 organizes species alphabetically according to taxonomic order by families of vascular plants, bryophytes, and lichens. Within each family, the genera are listed alphabetically, along with any synonyms (former names) and common names. In Part 2 species are organized alphabetically according to their scientific names. Part 3 lists common names followed by their scientific names. Excluded names (names inappropriately applied to plants in B.C.) are given in an appendix. Those familiar with plant taxonomy will find Part 1 particularly helpful when checking nomenclature; semi-professionals familiar with scientific names will use Part 2 and then Part 1; those who know only common names will check Part 3 and then Part 2 and Part 1 to determine families. There is presently considerable confusion about many species names in B.C. Plant names change for many reasons and new plants invade. Information about plants in B.C. is scattered in several checklists, most of them incomplete or out of date; for some species, such as liverworts, no provincial checklist even exists. This checklist therefore will be useful to all professionals working with vegetation and for students in agriculture, botany, ecology, forestry and other sciences. Although the focus is on B.C., the book will also be useful outside the province, particularly in the northwest American states and in Alberta and the Yukon.

A Garden from a Hundred Packets of Seed Penguin

Ce beau livre extraordinaire et curieux est paru à l'origine en 1847. Dans chaque chapitre, des planches de fleurs personnifiées sont accompagnées d'un conte qui est basé sur la mythologie et folklore de la fleur en question. Une collection tout à fait charmante que l'enfant tout comme l'adulte appréciera énormément. Grande partie des premiers livres, en particulier ceux qui datent d'avant 1920, sont aujourd'hui très rares et de plus en plus chers. Nous offrons des rééditions modernes de haute qualité et à prix abordables qui contiennent le texte et l'art originaux de ces ouvrages classiques.

Floret Farm's Discovering Dahlias Litres

In this first substantial study of Emily Dickinson's devotion to flowers and gardening, Judith Farr seeks to join both poet and gardener in one creative personality. She casts new light on Dickinson's temperament, her aesthetic sensibility, and her vision of the relationship between art and nature, revealing that the successful gardener's intimate understanding of horticulture helped shape the poet's choice of metaphors for every experience: love and hate, wickedness and virtue, death and immortality. Gardening, Farr demonstrates, was Dickinson's other vocation, more public than the making of poems but analogous and closely related to it. Over a third of Dickinson's poems and nearly half of her letters allude with passionate intensity to her favorite wildflowers, to traditional blooms like the daisy or gentian, and to the exotic gardenias and jasmines of her conservatory. Each flower was assigned specific connotations by the nineteenth century floral dictionaries she knew; thus, Dickinson's association of various flowers with friends, family, and lovers, like the tropes and scenarios presented in her poems, establishes her participation in the literary and painterly culture of her day. A chapter, "Gardening with Emily Dickinson" by Louise Carter, cites family letters and memoirs to conjecture the kinds of flowers contained in the poet's indoor and outdoor gardens. Carter hypothesizes Dickinson's methods of gardening, explaining how one might grow her flowers today. Beautifully illustrated and written with verve, The Gardens of Emily Dickinson will provide pleasure and insight to a wide audience of scholars, admirers of Dickinson's poetry, and garden lovers everywhere. Table of Contents: Introduction 1. Gardening in Eden 2. The Woodland Garden 3. The Enclosed Garden 4. The "Garden in the Brain" 5.

Gardening with Emily Dickinson Louise Carter Epilogue: The Gardener in Her Seasons Appendix: Flowers and Plants Grown by Emily Dickinson Abbreviations Notes Acknowledgments Index of Poems Cited Index Reviews of this book: In this first major study of our beloved poet Dickinson's devotion to gardening, Farr shows us that like poetry, gardening was her daily passion, her spiritual sustenance, and her literary inspiration...Rather than speaking generally about Dickinson's gardening habits, as other articles on the subject have done, Farr immerses the reader in a stimulating and detailed discussion of the flowers Dickinson grew, collected, and eulogized...The result is an intimate study of Dickinson that invites readers to imagine the floral landscapes that she saw, both in and out of doors, and to re-create those landscapes by growing the same flowers (the final chapter is chock-full of practical gardening tips). --Maria Kochis, Library Journal Reviews of this book: This is a beautiful book on heavy white paper with rich reproductions of Emily Dickinson's favorite flowers, including sheets from the herbarium she kept as a young girl. But which came first, the flowers or the poems? So intertwined are Dickinson's verses with her life in flowers that they seem to be the lens through which she saw the world. In her day (1830-86), many people spoke 'the language of flowers.' Judith Farr shows how closely the poet linked certain flowers with her few and beloved friends: jasmine with editor Samuel Bowles, Crown Imperial with Susan Gilbert, heliotrope with Judge Otis Lord and day lilies with her image of herself. The Belle of Amherst, Mass., spent most of her life on 14 acres behind her father's house on Main Street. Her gardens were full of scented flowers and blossoming trees. She sent notes with nosegays and bouquets to neighbors instead of appearing in the flesh. Flowers were her messengers. Resisting digressions into the world of Dickinson scholarship, Farr stays true to her purpose, even offering a guide to the flowers the poet grew and how to replicate her gardens. --Susan Salter Reynolds, Los Angeles Times Cuttings from the book: "The pansy, like the anemone, was a favorite of Emily Dickinson because it came up early, announcing the longed-for spring, and, as a type of bravery, could withstand cold and even an April snow flurry or two in her Amherst garden. In her poem the pansy announces itself boldly, telling her it has been 'resoluter' than the 'Coward Bumble Bee' that loiters by a warm hearth waiting for May." "She spoke of the written word as a flower, telling Emily Fowler Ford, for example, 'thank you for writing me, one precious little "forget-me-not" to bloom along my way.' She often spoke of a flower when she meant herself: 'You failed to keep your appointment with the apple-blossoms,' she reproached her friend Maria Whitney in June 1883, meaning that Maria had not visited her . . . Sometimes she marked the day or season by alluding to flowers that had or had not bloomed: 'I said I should send some flowers this week . . . [but] my Vale Lily asked me to wait for her.'" "People were also associated with flowers . . . Thus, her loyal, brisk, homemaking sister Lavinia is mentioned in Dickinson's letters in concert with sweet apple blossoms and sturdy chrysanthemums . . . Emily's vivid, ambitious sister-in-law Susan Dickinson is mentioned in the company of cardinal flowers and of that grand member of the fritillaria family, the Crown Imperial."
