The main main purpose of the book was to counter the rather simplistic view of the discipline of usul al-fiqh that it represents a single uniform

theory, called the classical theory. The view presented in this book was that there is no uniform single legal theory in Islam. The view of a uniform theory was held not only by the Orientalists, but many Muslim scholars as well. The view did not do justice to Islamic jurisprudence for it overlooked the rich diversity found in the Islamic legal system. Instead of one, the book shows, there are at least three legal theories, each of which has been explained by the author in some detail and with remarkable lucidity. Each of these theories has played a useful role in the past and each can play even today a vital role in the development of Islamic law. Another purpose was to explain the paradox of the so-called rigidity of Islamic law at the theoretical level accompanied with a perceptible degree of laxity in practice. The author forcefully argued that the Islamic Legal system comprises two cooperating spheres. The first sphere is relatively fixed since it is focused on given texts. This sphere falls within the domain of the jurists. The other sphere, which draws upon the general principles of Islamic law, regulates the law made by the state. These are separate but complementary spheres. Neither is the relative fixity of the first sphere a manifestation of the Muslim jurists' mental rigidity. Nor is the flexibility of the second sphere the manifestation of any cynical disregard of the revealed texts on the part of the rulers. The book has been influential in many other ways, and has given rise to research in several new directions. First published in 1994, it is still used by teachers, researchers, university students and general readers.

The Art of District 9 Palgrave Macmillan The Hidayah has dominated the field of Islamic jurisprudence since the day it was written over 800 years ago. It has been the primary text used by Muslim jurist to issue authentic and reliable rulings on Islamic law according to the school of Imam Abu Hanifa (d 150H/767CE). The Hidayah commands such an authoritative position amongst the doctors of law that the knowledge of a scholar who has not read it is not considered reliable. It has been a standard text in the curricula of Islamic law schools since the 12th century. It was first translated into English by Charles Hamilton in 1791. Around 70 huge commentaries, some spread over more than a dozen volumes have been written on it. The number of explanatory glosses is in thousands. Comprehensive in content and conveniently organized, with the publication of this all previous works that discussed Islamic jurisprudence according to the Hanafi law become outmoded and soon fell into disuse. If revealed books are not taken into account, never has a book received so much attention as the Hidayah. This landmark publication of the Hidayah not only has been translated in its entirety for the first time but has been done so from Arabic, the language in which it was written. The author, Shaykh Al Islam, Burhan Al-Din Marghanani (d 593 AH/ 1197 CE) was considered to be the leading jurist of the Muslim world in his times. "The hidayah is justly celebrated as the most practical and useful summary compilation of Hanafi jurisprudence. It has been a standard text in the curricula of Islamic law schools since the 12th century. It was first translated by Charles Hamilton in 1791. A new translation into modern English has been long overdue. This translation by Imran Ahsan Khan Nyazee is both precise and straight forward. With his knowledge of Islamic law and jurisprudence combined with his command of both the Arabic and English languages, he has conveyed the meaning of the original with great clarity. The hidayah is a dense work, intended for use in teaching Hanafi fiqh - it is a work that needs explication if its arguments are to be understood fully. This the translator has provided through this valuable notes" Dr Mohammad Akram Nadwi, research fellow, Oxford centre for Islamic studies, Oxford
