The current dynamics of world economy show remarkable changes in the socio-economics of credit provision and entrepreneurship. If the emergence of the sharing economy is fostering innovative models of collaborative agency, networking and venture business, economic actors are also looking for a more sustainable development, able to foster profitability as well as community welfare. This book investigates Islamic social finance as a paramount example of this economy under change, where the balance between economic efficiency and social impact is contributing to the transformation of

the market from an exchange- to a community-oriented institution. The collected essays analyse the social dimension of entrepreneurship from an Islamic perspective, highlighting the extent to which the rationales of "sharing," distribution and cooperation, affect the conceptualization of the market in Islam as a place of "shared prosperity." Moving from the conceptual "roots" of this paradigm to its operative "branches," the contributing authors also connect the most recent trends in the financial market to Shari ' ah-based strategies for community welfare, hence exploring the applications of

Islamic social finance from the sharing economy, FinTech and crowdfunding to microcredit, waqf, zakat, sukuk and green investments. An illuminating reference for researchers, practitioners and policy-makers dealing with the challenges of a global market where not only is diversity being perceived as a value to be fostered, but also as an important opportunity for a more inclusive economy for everybody.

Within the context of Malaysia's recent political history, it charts the evolution of Mahathir's complex

world-view to reveal paradoxes, alternating patterns of consistency and contradiction, which help us understand his politics, policies, and personality. In biographical terms, it examines the legacy of Mahathir's youthful immersion in the Malay world, the class background to his religiosity, and the medical influence on his political style.

A detailed look at the fast-growing field of Islamic banking and finance **The Art of Islamic Banking and Finance** is a modern American take on what it means to incorporate Islamic finance principles into everyday banking and investment techniques by introducing a new brand of banking for all

people of all faiths: The Riba-Free (RF) banking. The author is considered the father of RF (Islamic) banking in America. He has been a banker and an Imam/scholar for over 40 years in America since 1968. He started the tedious process with a finance company, LARIBA, in Pasadena, California in 1987. This is the first book ever in the field to trace the origins of prohibiting the renting of money at a price called interest rate and over-indulging in debt. The book reviews in great details the theological foundations of prohibiting interest in the Jewish Bible, the Christian Bible, and the Qur'aan. The author then discusses money and how fiat money is created, the role of the Federal Reserve, and the banking system in America. The book also discusses for the first time ever how to include an important aspect of RF (Islamic) finance using commodity indexation and marking the items to be financed to market in order to avoid participating in economic "bubbles." The author discusses how these rules work, how they affect consumer behavior, and how they change the role of the banker/financier. Covers a new pioneering model that is based on the Law (Shari'aa) and how it is applied in every transaction from joint ventures and portfolio management to home mortgages and personal financing Shows how to incorporate the Law (Shari'aa) into American financing and banking systems Points to RF (Islamic) finance and banking as a way to emphasize socially responsible investing The Art of Islamic Banking and Finance also includes a discussion on the emergence of a culture of RF (Islamic) banking and finance today, which is based on the real Judeo-Christian-Islamic spirit and very effective when compared to twentieth-century models that use financial engineering and structuring

techniques to circumvent the Law (Shari'aa). The book also includes case studies based on the actual experience of the author and detailed analysis of the superior results realized by applying this new brand of banking to financing.

Islam represents more than 1.6 billion believers worldwide. Thereby it is the second largest religion behind Christians. But there are many reservations and prejudices with regard to this belief in particular in the western world. Because of that the famous author James A. Michener (1907-1997) wrote the following text already in 1955. Trying to understand the characteristics of Islam is today more topical than ever. This booklet, getting for yourself or giving as a present, is suitable to start in this way, that you will be able to know the origin and nature of Islam.

Now, for the first time, a philosopher undertakes a systematic investigation of the moral and aesthetic issues to which cultural appropriation gives rise. Cultural appropriation is a pervasive feature of the contemporary world (the Parthenon Marbles remain in London; white musicians from Bix Beiderbeck to Eric Clapton have appropriated musical styles from African-American culture) Young offers the first systematic philosophical investigation of the moral and aesthetic issues to which cultural appropriation gives rise Tackles head on the thorny issues arising from the clash and

integration of cultures and their artifacts
Questions considered include: “ Can cultural appropriation result in the production of aesthetically successful works of art? ” and “ Is cultural appropriation in the arts morally objectionable? ” Part of the highly regarded New Directions in Aesthetics series

Syncretism/Anti-Syncretism Pearson Higher Ed
Bitcoin first appeared in January 2009, the creation of a computer programmer using the pseudonym

Satoshi Nakamoto. His invention is an open-source (its controlling computer code is open to public view), peer-to-peer (transactions do not require a third-party intermediary such as PayPal or Visa) digital currency (being electronic with no physical manifestation). The Bitcoin system is private, with no traditional financial institutions involved in transactions. Unlike earlier digital currencies that had some central controlling person or entity, the Bitcoin network is completely decentralized, with all parts of transactions performed by the users of the system. With a Bitcoin transaction there is no third-party intermediary. The buyer and seller interact directly (peer to peer), but their identities are encrypted and no personal information is transferred from one to the other. However, unlike a fully anonymous transaction, there is a transaction record. A full transaction record of every Bitcoin and every Bitcoin user's encrypted identity is maintained on the public ledger. For this reason, Bitcoin transactions are thought to be pseudonymous, not anonymous.

Although the scale of Bitcoin use has increased substantially, it still remains small in comparison to traditional electronic payments systems, such as credit cards, and the use of dollars as a circulating currency. Congress is interested in Bitcoin because of concerns about its use in illegal money transfers, concerns about its effect on the ability of the Federal Reserve to meet its objectives (of stable prices, maximum employment, and financial stability), and concerns about the protection of consumers and investors who might use Bitcoin. Bitcoin offers users the advantages of lower transaction costs, increased privacy, and long-term protection of loss of purchasing power from inflation. However, it also has a number of disadvantages that could hinder wider use. These include sizable volatility of the price of Bitcoins, uncertain security from theft and fraud, and a long-term deflationary bias that encourages the hoarding of Bitcoins. In addition, Bitcoin raises a number of legal and regulatory concerns, including its potential for facilitating money laundering, its treatment under federal securities law,

and its status in the regulation of foreign exchange trading.

The results are in. The evidence has been analyzed. Research shows that the lack of enterprise-wide training is the biggest reason for ERP implementation failures. It is the single most important precursor to achieving success.

Integrated Learning for ERP Success is the first resource to offer a specifically defined, comprehensive method for planning, delivering, and evaluating ERP training efforts. It even includes formulas for determining training return on investment. The Learning Requirements Planning (LRP) process presented involves a six-step enterprise-level instructional design model that when implemented correctly assures success. If you would rather have a root canal than oversee an ERP implementation, you are not

alone. But like avoiding a root canal, avoiding ERP implementation only causes more pain. This book eases the implementation pain. It shows you how a formal plan for learning will increase the productivity of the ERP implementation team, shorten overall implementation time, and substantially decrease implementation costs. It also provides a discussion on how an ERP implementation can be used as a catalyst for lifelong organizational learning. Implementing an ERP system can cost three to ten times the actual software purchase price. You can't afford to waste money or time in the areas of ERP education.

Integrated Learning for ERP Success shows you how to create learning-focused ERP implementations that provide substantial savings and the competitive advantage.

Dunia hari ini terlalu mencabar dan banyak rintangan yang perlu dilalui. Hanya mereka yang kuat iman dan takwa sahaja akan berjaya mengharungi mehnah mendatang. Dunia juga sudah terlalu tua dan tiba masanya akan "pergi" jua. Andai tiada bekalan dibawa, rugilah insan yang menjejakkan kaki ke akhirat nan abadi. Kita, ada kalanya alpa dalam arus kemodenan hari ini. Hanya peringatan daripada ibu dan ayah menjadi paksi kekuatan diri untuk terus berada di landasan hakiki. Doa mereka menjadi sebab rahmat ILAHI bertandang dalam kehidupan, kasih sayang mereka jua tidak pernah surut. Sungguh, jasa mereka terlalu banyak dan tidak terbalas dek kita.

Jin adalah makhluk yang bersama-sama dengan kita menghuni planet bumi ini, Bahkan kehadiran jin jauh lebih dulu daripada manusia. Jin juga adalah makhluk mukallaf yang dikenai hukum dan kewajiban seperti manusia, karena mereka juga memiliki akal, nafsu dan kehendak bebas. Allah SWT berfirman: Tidakkah Aku ciptakan jin dan manusia kecuali untuk beribadah kepada-Ku. Namun, karena sifatnya secara umum yang tidak terlihat oleh mata manusia, maka kita kadang-kadang memperoleh gambaran-gambaran yang keliru tentang bentuk, sifat dan kehidupan jin. Buku ini berusaha merekam dialog antara penulisnya.

Muhammad 'Isa Dawud, dengan salah satu Jin-Muslim. Dialog tersebut begitu lugas, sehingga menjadikan buku ini benar-benar asyik dibaca. Dari dialog-dialog ini, pembaca akan memperoleh berbagai informasi baru yang menakjubkan tentang dunia jin yang sebenarnya. Buku ini sedikit-banyak akan meluruskan persepsi-persepsi kita yang salah tentang bentuk, watak dan kehidupan jin: sejak asal-mula jin hingga berbagai kejadian yang berkaitan dengan jin, seperti gangguan setan dan sihir, lengkap dengan cara pengobatannya. Untuk setiap topik dialog, penulisnya menambahkan catatan yang merujuk kepada Alquran, hadis Nabi saw., serta temuan-temuan ilmiah demi mengukuhkan kebenaran pernyataan jin tersebut.

Daughters Who Walk This Path depicts the dramatic coming of age of Morayo, a spirited and intelligent girl growing up in 1980s Ibadan who is

thrust into a web of oppressive silence woven by the adults around her. It's a legacy of silence many women in Morayo's family share. Only Aunt Morenike—once protected by her own mother—provides Morayo with a safe home, and a sense of female community which sustains Morayo as she grows into a young woman in bustling, politically charged, often violent Nigeria.

Revival of Religion's Sciences (Ihya Ulum ad-din) 1-4 Vol 1 The Other Press

This landmark book, first published in 1987, is now back in print, with a new introduction by its award-winning author. An interdisciplinary approach to the central themes of scientific and religious thought, this book was widely heralded upon its publication for the richness and depth of its contribution to the science and religion dialogue. “ notable for its breadth and depth . . . filled with admirably argued and powerfully

presented treatments of critical issues. ” —Joseph Pickle, Colorado College, *Zygon: Journal of Religion and Science* “ a superb and subtle book. ” —David Foxgrover, *Christian Century* “ a monumental work . . . [T]he book is truly outstanding. ” —John H. Wright, *Jesuit School of Theology, Berkeley, Theological Studies* “ Rolston ’ s presentation of the methods of science, along with up-to-date summaries of the main achievements of the various sciences, is commendable for its clarity and critical acumen. ” —Choice According to Holmes Rolston III, there are fundamental questions that science alone cannot answer; these questions are the central religious questions. He uses the scientific method of inquiry to distill key issues from science, and then he integrates them in a study that begins with matter and moves through life, mind, culture, history, and spirit.

Incorporating religious and scientific worldviews, he begins with an examination of two natural sciences: physics and biology. He then extrapolates examples from two human sciences: psychology and sociology. Next, he moves to the storied universe and world history, raising and addressing religious questions. “ Never in the histories of science and religion have the opportunities been greater for fertile interaction between these fields, with mutual benefits to both, ” states Rolston. The re-publication of this book provides current researchers and students in the field an invaluable, timeless methodological resource. The new introduction offers updated insights based on new scientific research.
